(2)5mm, & (2)4mm

Mortise Marker^{XL}

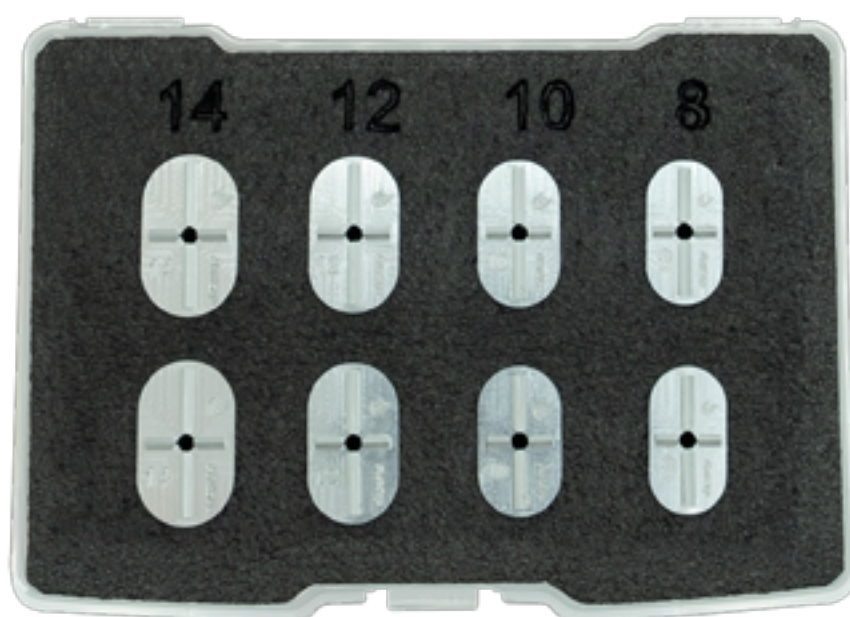

WORKS WITH

FESTOOL

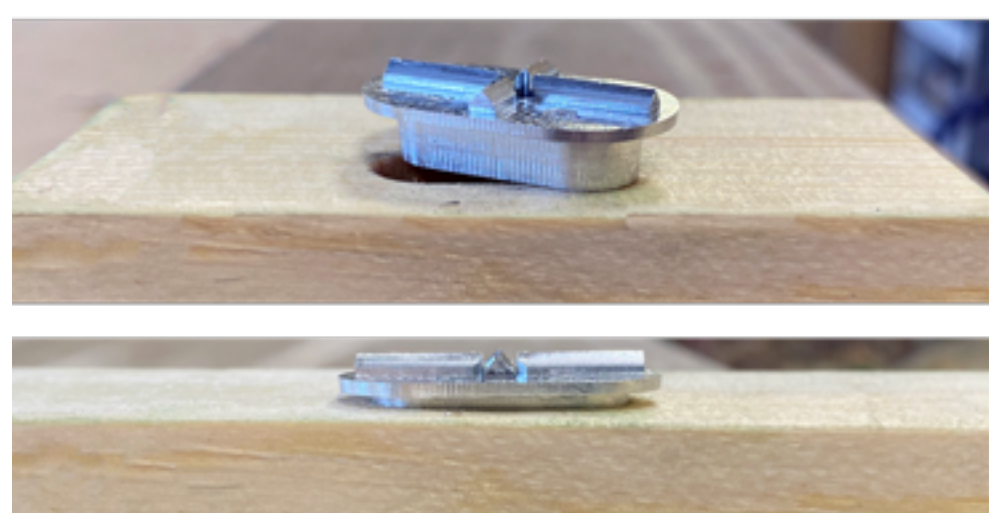

DOMINO XL DF
700 JOINER

Included Sizes:

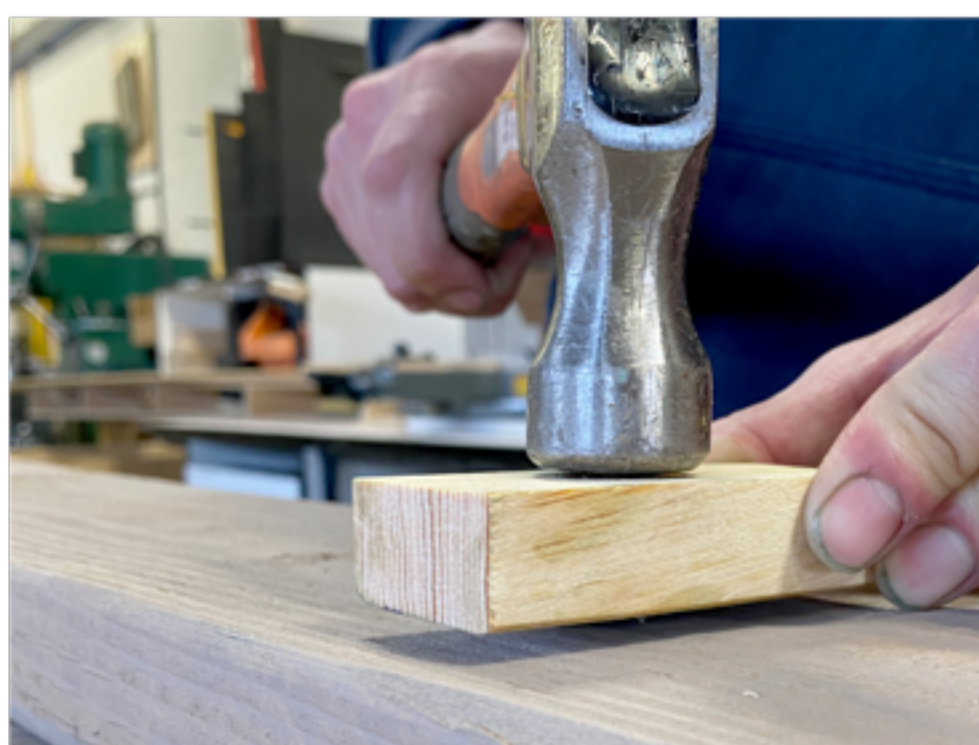

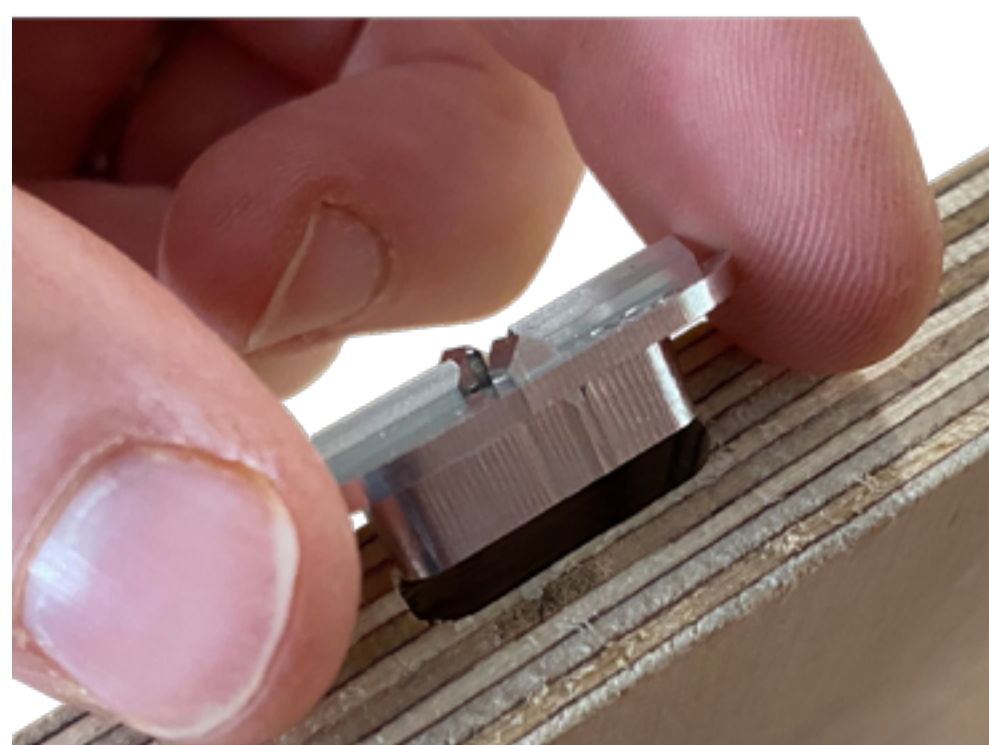

(2)14mm, (2)12mm,
(2) 12mm, & (2)8mm

Festool Domino Joiner not included with purchase

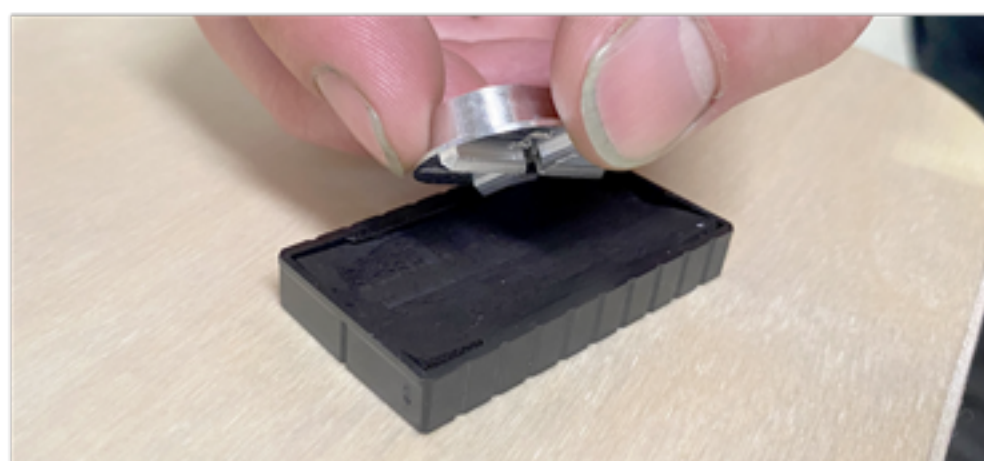

5 degree taper creates perfect centering in an existing mortise hole.

Mortise Marker allows you to easily mark the center of your second mortise by simply inserting the marker into the first mortise and then lining the two mating pieces up and tapping with a hammer.

The marker will leave a cross-hair imprint that can be extended with a pencil line to easily align your Domino Joiner to your second cut.

For harder woods we recommend using stamp pad to ink the Marker in order to assist with transferring the cross-hairs easily.
