

WE PROVIDE THE WORLD WITH
**CUSTOMER UNIQUE
CABLE INNOVATIONS**

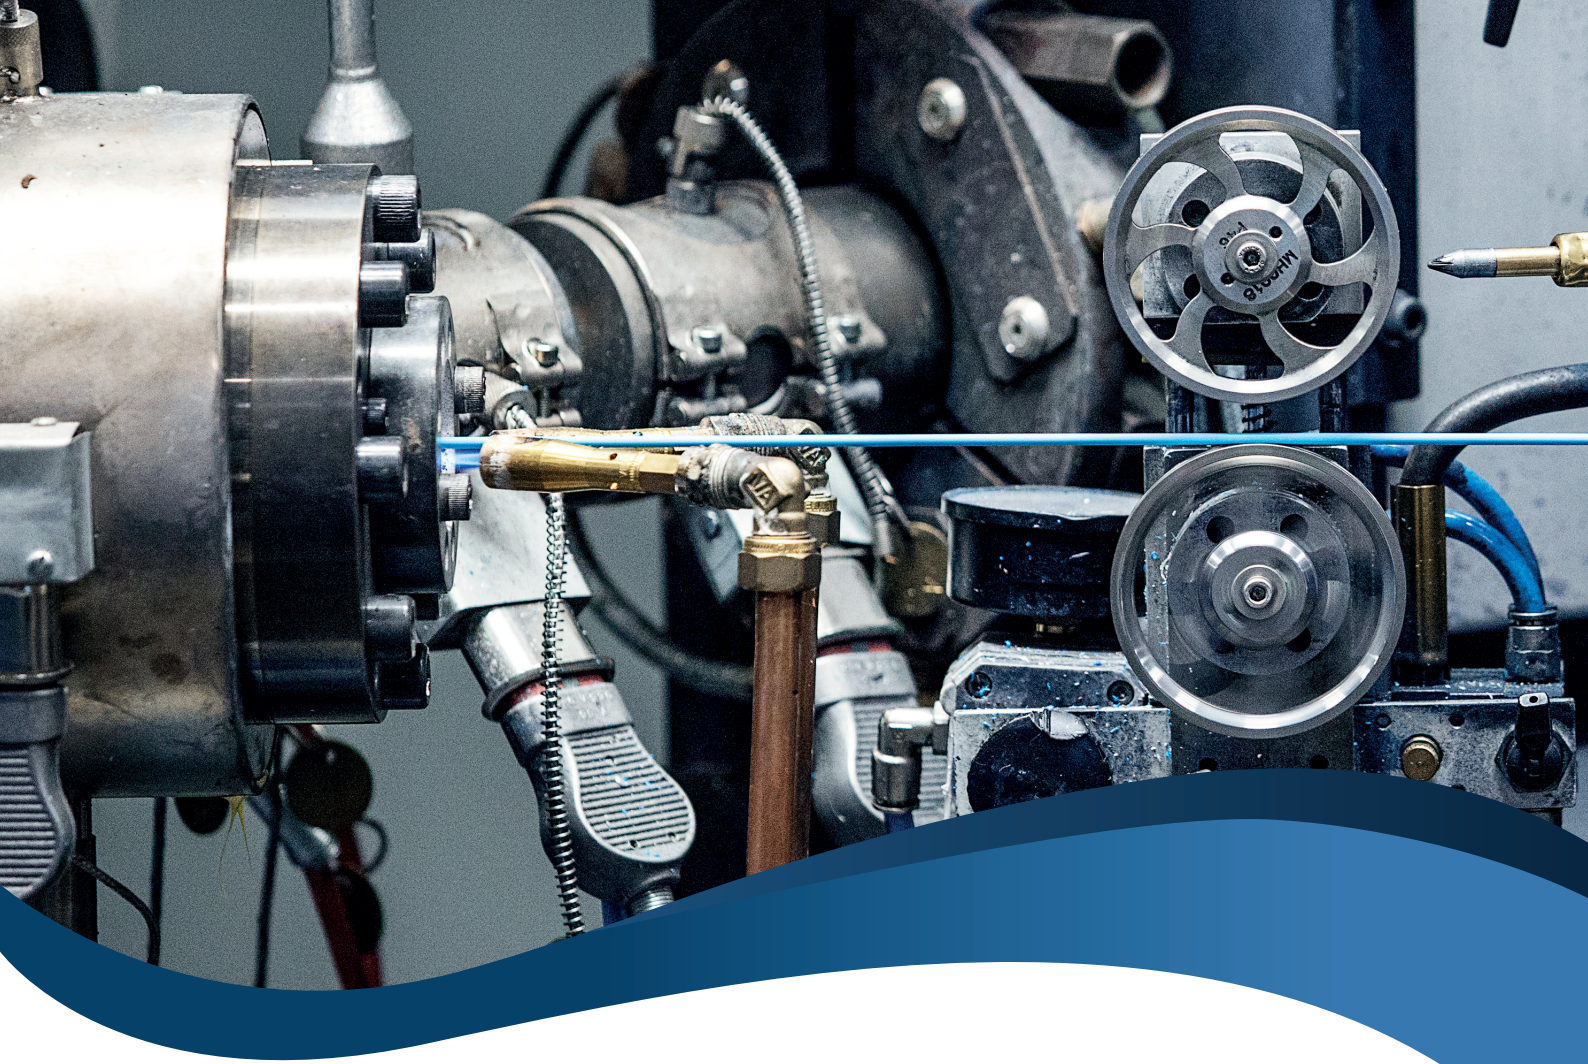

CABLE MANUFACTURING SINCE 1992

The first company in the Amokabel group was established in 1992. By focusing on technological development and modernisation, we have organically managed to build a profitable and successful group in a short period of time. Our constant pursuit of growth has resulted in several new companies active in the manufacturing and distribution of cable.

Amokabel has a total of 32 000 m² production area. The main office and factory are located in the city of Alstermo in the Småland region of Sweden, 70 km from Växjö and Kalmar.

OUR VISION

Innovation is the key word in all of our operations. Our vision is to invent, design and produce cable for the needs of the future. We work closely with customers to tailor-make solutions and find the right cable for the right application or system.

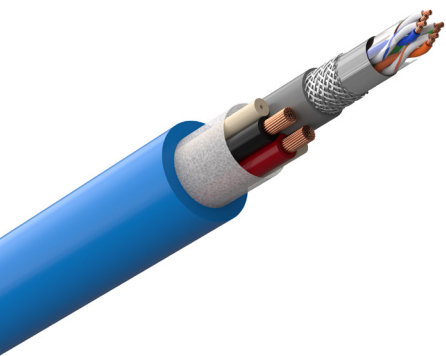

In addition, we are innovative in our work for a sustainable world.

Through large investments in solar, wind and hydro power, we produce more green electricity than we consume. Amokabel works extensively with events and activities for the community. We are partners in healthcare and a major sponsor of local sports.

Through the founders' ownership foundation, each significant amount is allocated to stimulate and develop the local region's businesses and institutions.

WE PRODUCE UNIQUE CABLES AFTER YOUR REQUESTS

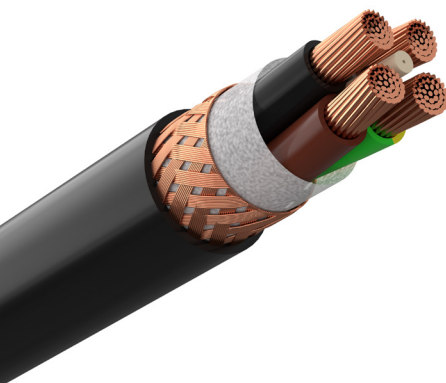

The division for special cable have several extrusion lines, cabling machines and braiding / armoring lines. We have a wide range of materials with different properties and by continuously evaluate new materials we are able to offer new solutions for customers' demands. Up until now we have manufactured more than 8 000 different cable constructions. We are able to meet the requirements in your area of business.

SENSOR CABLE/ COMMUNICATION

amokabel has a complete range of marine approved ship cables. The cables are developed together with our customers for the best possible result. We combine electrical, physical and assembly friendly properties in such a way that it is optimally.

amo specialkabel is constantly in the forefront to simplify installation in maritime

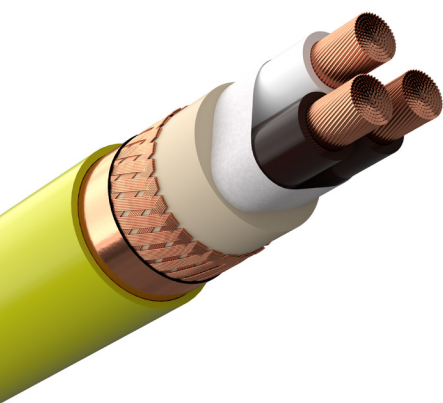

INDUSTRY

amokabel is producing special designed cables according to customers demands and specifications with all types of braiding (EMC), foiling, taping and armoring

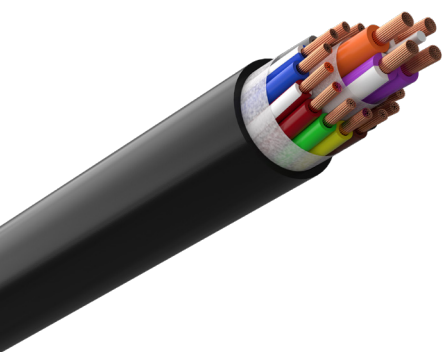

In addition we produce a wide range of internal wires for switchboard and panel applications. We have wires and cables with different approvals, such as Semko, UL, DNV and CE.

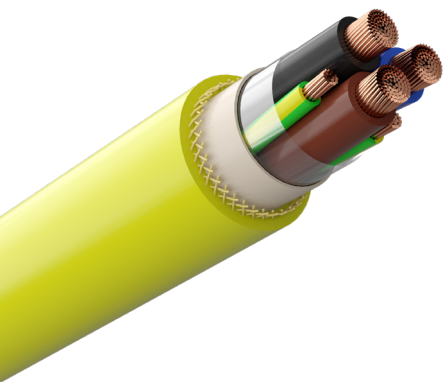

SHIPBUILDING

amokabel has a complete range of marine approved ship cables. The cables are developed together with our customers for the best possible result. We combine electrical, physical and assembly friendly properties in such a way that it is optimally. amospecialkabel is constantly in the forefront to simplify installation in maritime environments with a focus on cost-effective and reliable products.

AUTOMOTIVE

Low voltage wires and cables for cars, trailers, trucks and other vehicles. Here you find for example Single automotive wire, Multicore cables, ADR-cables and Battery cables.

MINING

amokabel is producing a range of mining cables, such as extra rigid, fire proof and customer designed. We have cables designed both for fixed power supply installations and for reel applications.

© Atlas Copco

AIRPORT

amokabel is manufacturing 400Hz cables to meet the high demands in the Aviation industry, such as: oil & chemical resistance, survive in harsh environments, abrasion resistance etc., and we produce power cables to meet all applications, such as: PBB's, cable hoist, cable retrievers, crocodiles, pits, mobile GPU's etc.

OUR STRENGTH IS INNOVATION AND FLEXIBILITY

amokabel is a tight organization with minimal administration, our facility has modern machinery and production adapted for quick changes. This enable us to be flexible and provide short lead times

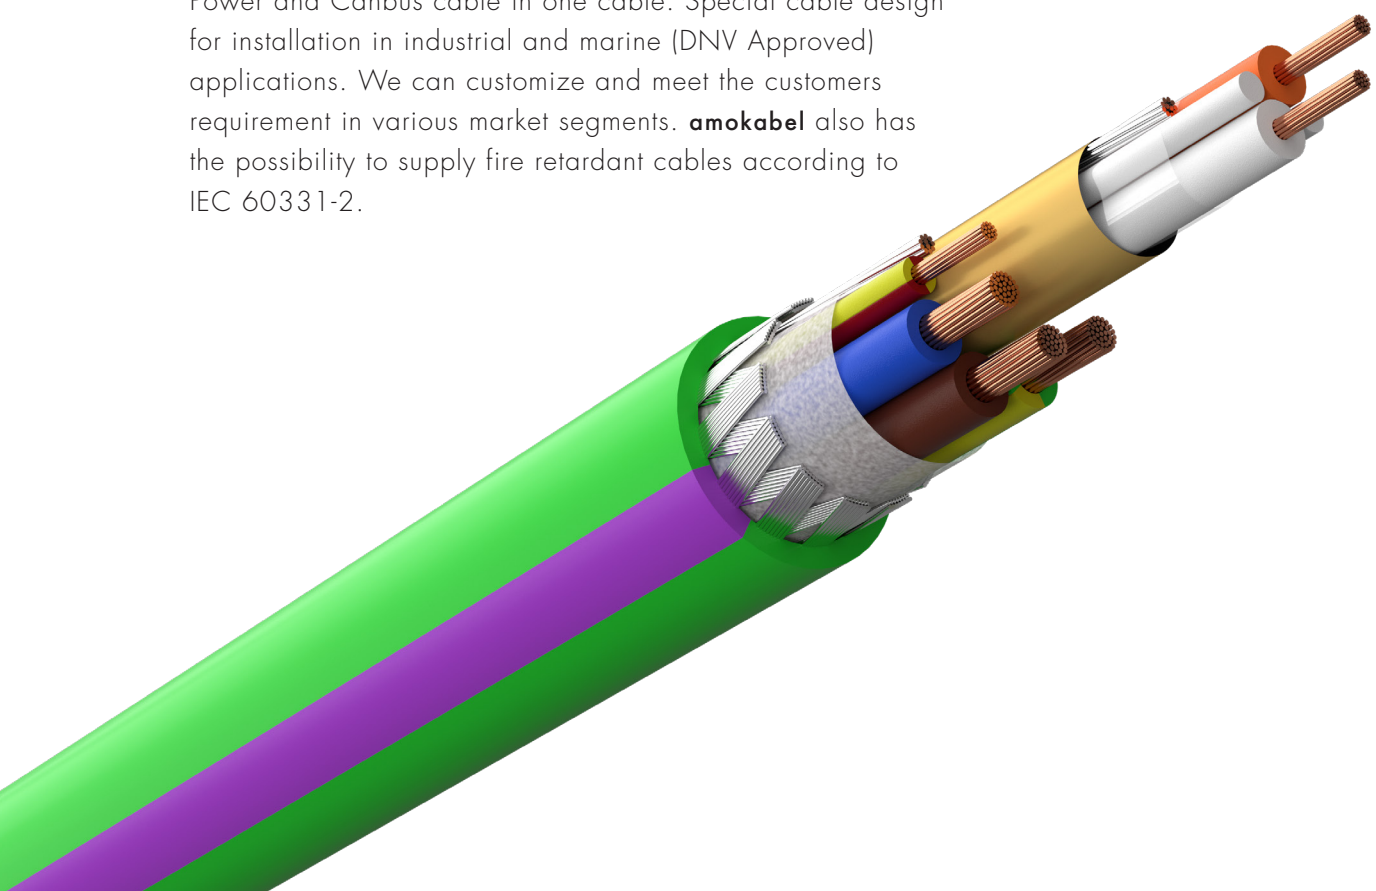

Availability, efficiency and flexibility are key words in our daily business.

Everyone in our organization puts high focus on the customer. Our vision is to have a close cooperation with our customers to understand their needs and to find the best solutions.

Satisfied customers is a very important goal of quality for us!

CANBUS HYBRID

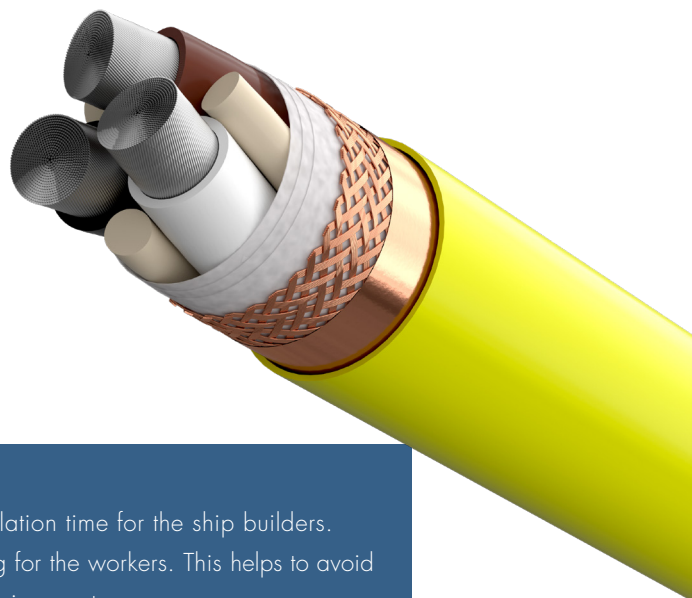

Power and Canbus cable in one cable. Special cable design for installation in industrial and marine (DNV Approved) applications. We can customize and meet the customers requirement in various market segments. **amokabel** also has the possibility to supply fire retardant cables according to IEC 60331-2.

ALUSHIP CONNECT

Traditionally, power cables for marine use have been made with copper, but **amokabel** started a project in 2012 with the main purpose to replace copper with flexible aluminium.

The reason behind it was that **amokabel** saw number of benefits for the customers operational cost, to replace copper with flexible aluminium.

BENEFITS

Installation: The reduced weight on ALUShip Connect reduces the installation time for the ship builders.

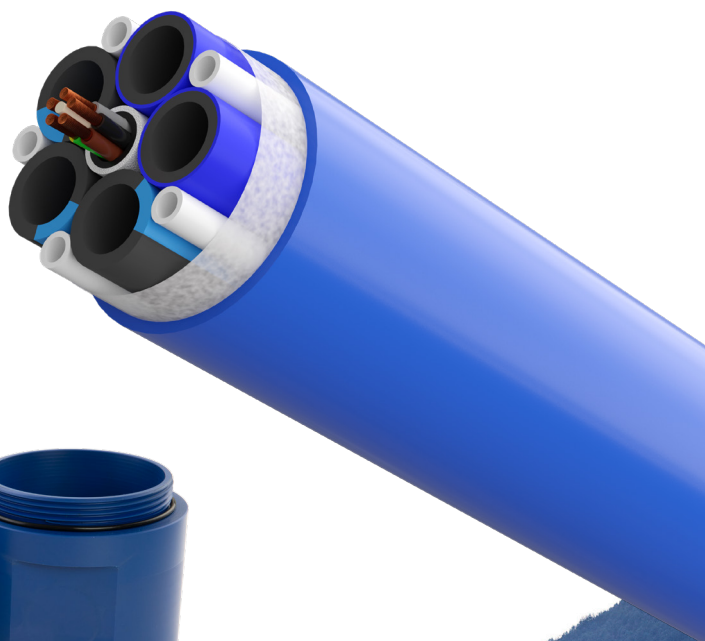

HSE: This light weight ALUShip Connect reduces the weight and handling for the workers. This helps to avoid accident and injuries which bestow the installers a much better working environment.

Operational cost: The benefit of implementing the ALUShip Connect, the yield is reduced fuel consumption, quicker installations and better price stability of aluminium compared with copper.

Environmental: Installing ALUShip Connect reduces fuel consumption and contributes to less emissions, which helps the aim to reduce the carbon oxide in our environment.

OXYSMART

amokabel has developed a system for Supply of Oxygen and electricity to fish farm cages. By introducing oxygen into the cages, you improve the appetite and make the fishes grow faster. The system is based on multi hybrid cable containing copper, fibres and hoses and a special designed connector to distribute the power and oxygen.

FACTS AND KEY FIGURES

- Founded in Alstermo in 1992
- Owner: Jan & Erlands Foundation and Management
- Number of employees: 200
- Sales in 2017 EURO 90 million
- The factory in Alstermo consists of 32 000 m² production area
- More than 8,000 unique cable designs
- Our energy producing companies generate more than 6 500 000 kW
- Locally represented with sales offices in Norway and Finland
- Manufacturing in Hungary and India
- Certified in accordance to SS-EN ISO 14001:2004 and SS-EN ISO 9001:2008

GLOBAL EXPANSION

Initially, **amokabel** engaged solely in sales in Sweden. Today, the majority of our sales are export sales. Together with our own sales offices and extensive agent and distribution network, we always have a global presence. For example, we supply many of the world's largest airports with cable, and our unique covered conductors electrify several countries in Asia. Our consumer packaged house wiring cable can be purchased in several retail chains in Scandinavia.

OUR SUSTAINABILITY WORK

We at **amokabel** work for responsible business operations, which means that we are constantly aware of how the company affects society and the environment. This is closely related to sustainable development; balancing economic aspects with environmental and social aspects. We create value for our customers and other key stakeholders while also striving to minimise the negative impact on the environment.

*One example of our work is that we have, for a long period of time, systematically worked to ensure that the group, to the highest extent possible, uses electricity from renewable sources.

*The investment of the solar plant in 2016 is part of our active work towards sustainable development. Along with energy supplied from our own water turbines in Alstermo and Uvafors and two larger wind turbines, the business is self-sufficient in environmentally friendly electrical energy.

HSE / ENVIRONMENT / QUALITY

amokabel strives towards environmentally friendly operations and productions. We are approved according to ISO 9001 as well as 14001 and work very hard to develop our production to improve our processes. **amokabel** puts HSE question very high on our agenda and take all measures at its disposal to protect the health and safety of its personnel. **amokabel** shall also protect the environment in which it operates.
