LIGHTING

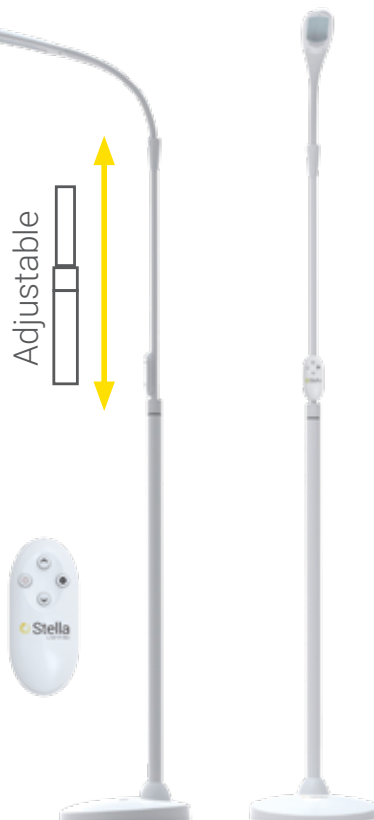

Better Light. Better Life.

(NEW) Stella»TWO

Stella»TWO is 25% brighter, offers an improved tactile touch pad control, and has 10-step dimming. These features make the Stella»TWO the most versatile LED task light in the marketplace today.

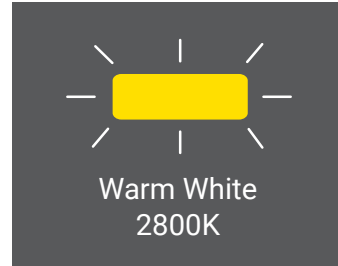

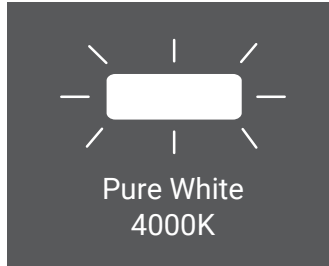

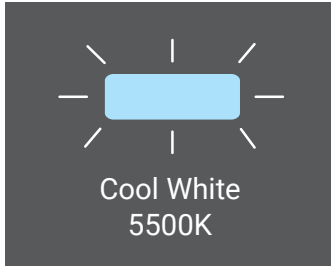

StellaSKY»TWO

Our #1 selling light, the StellaSKY»TWO is the ideal choice for those individuals that work at night in the comfort of their own home. Everyone can appreciate the extendable height ranging 4-6 feet, wireless remote control, tri-spectrum technology, and 5-step dimming capability.

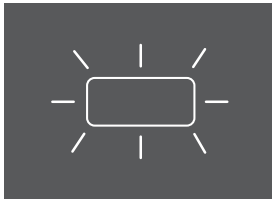

» Standard Features

Tri-Spectrum Technology

What makes Stella Lighting products unique is that we offer three color spectrums of light in one lamp.

50,000+ Hours And No Bulb Replacement

Stella utilizes state of the art LED technology on all our products. Designed to be extremely durable and long lasting, our products offer maximum control over spectrum and intensity.

Low Energy Costs

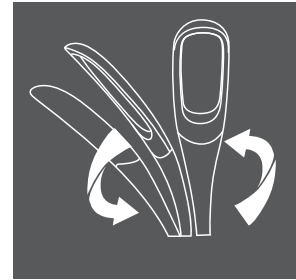

On average, Stella Lighting products use less than 12 watts of electricity. You can be confident that you're saving energy and having a positive environmental impact.

No UV and Less Heat

LEDs produce very little heat and no UV rays so the light is comfortable and safe for you and your eyes.

Flex Arm

A super strong, super flexible neck allows you to get the light exactly where you need it!

Touch Integration

Touch integration controls the original task lamp. A light touch of a finger on the base of the lamp and you can control the light spectrum settings and dimming function.

Dimming

Dimming is available within each color spectrum mode.

Handy Carrying Case

Stella's box acts like a carrying case! After you have unpacked your light, be sure to keep the box as it makes the perfect travel case.

» What's New | Stella»TWO

The Stella»Two LED Task Lamp is the newest member of the Stella family. Intelligently designed with the user in mind, the Stella»Two is for the individual who needs more overall light output, greater control over intensity and enhanced tactile feel. The Stella»Two is the ideal product for individuals who utilize adaptive technologies for low vision, reading, crafting and creating. The weighted base keeps the lamp steady while the flex arm allows the light to be rotated nearly every direction.

Based on consumer feedback and extensive testing from low vision users, we re-designed the touch pad to include raised tactile control buttons.

New and improved Philips Lumiled LEDs provide over 1000 lumens, making it the brightest we have ever built. Expanded 10-step dimming offers maximum control over light intensity and spectrum.

A ridged chimney on the base gives the user a more tactile grip allowing for easier handling and transport.

» Performance. Function. Value.

Stella»TWO

Input Power 11.5W

Warm White 2900 | CRI 84 | Efficacy 95

Natural White 4100 | CRI 86 | Efficacy 89
