Wood

The Wood series was developed together with Christian Halleröd design and combines high quality with good design. The series is compatible with all our shelving systems and can be planned against both the wall and in an open landscape. Steel can feel as a cold material, but by integrating the wood, you soften and create welcoming environments that invite you to work and study. The products are produced in either melamine-coated or veneered particle boards, and all cabinets are assembled directly from the factory. To put your own personal touch, you can add shelves and cabinets with a decorative tray available in all standard colours.

The table offers the possibility to interface with power- and usb- connectors for easy connection of lighting or charging of a computer, tablet or phone and supplementing a back panel in matching material.

Model: Wood low

Wooden shelf Wood 126 mm

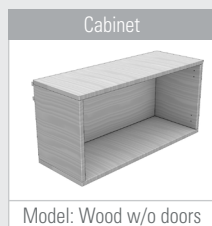

124001	Birch veneer, 800x320 mm
124002	Oak veneer, 800x320 mm
