

Assembly

Instruction

Littbus 290/2044 (standard 6 shelves/section)

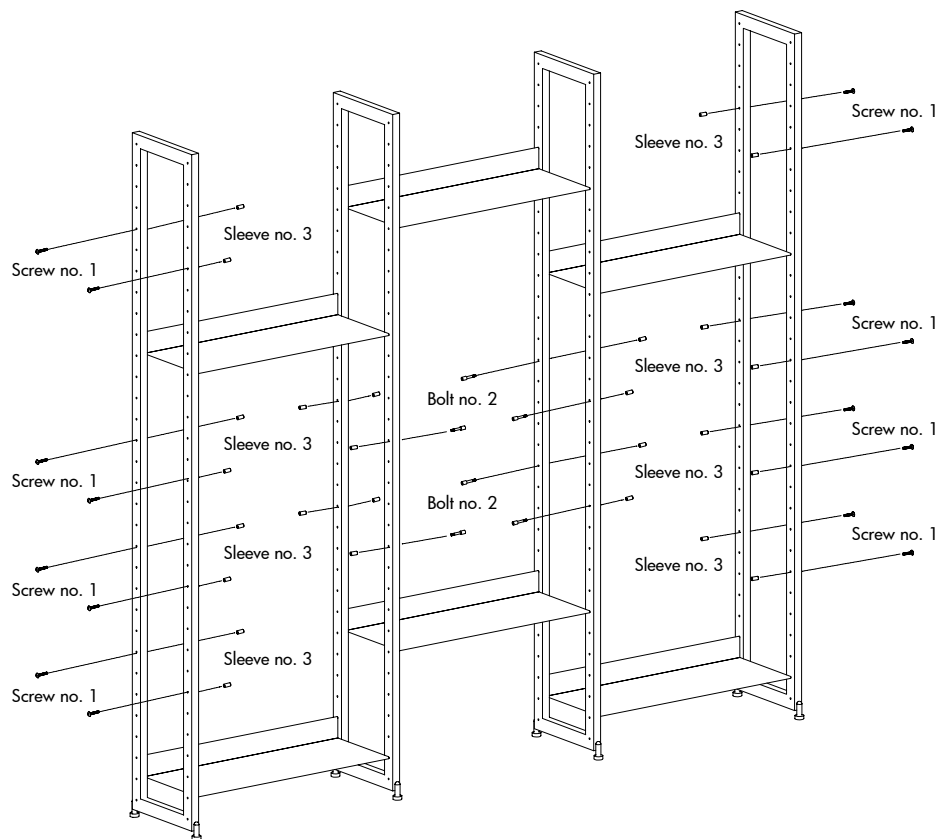

Tip*
To make sure to get the right distance between the shelves, put screws in the holes. (Every fifth hole at standard).

1.

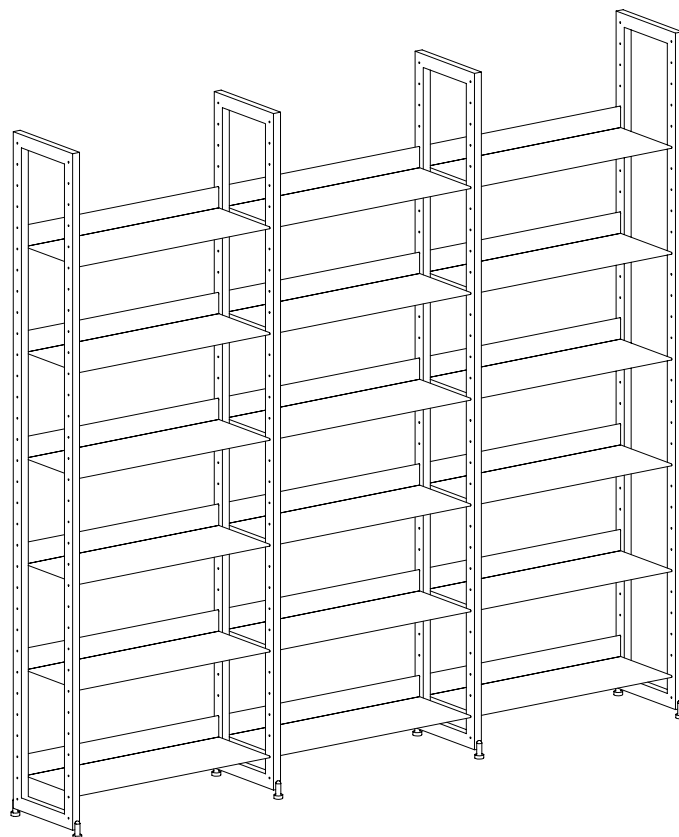

Assembly the upper and lower structural shelves to the end panel.
Use screw no. 1.

Position the next upright and screw it to the structural shelves, use bolt no. 2.
Alternate up and down, until the required number of sections are assembled.
Finish with screw no. 1. (See picture above).

2.

Connect sleeve no. 3 with screw no. 1 in the end panels, (every fifth hole at standard).
At the inner panels connect sleeve no. 3 with bolt no. 2 (every fifth hole at standard).

3.

Place the loosen shelves.
First locate the shelf front, then lower the back into place.

Assembling is completed.
