

Assembly Instruction

Littbus 542/1084 (standard 3 shelves/section)

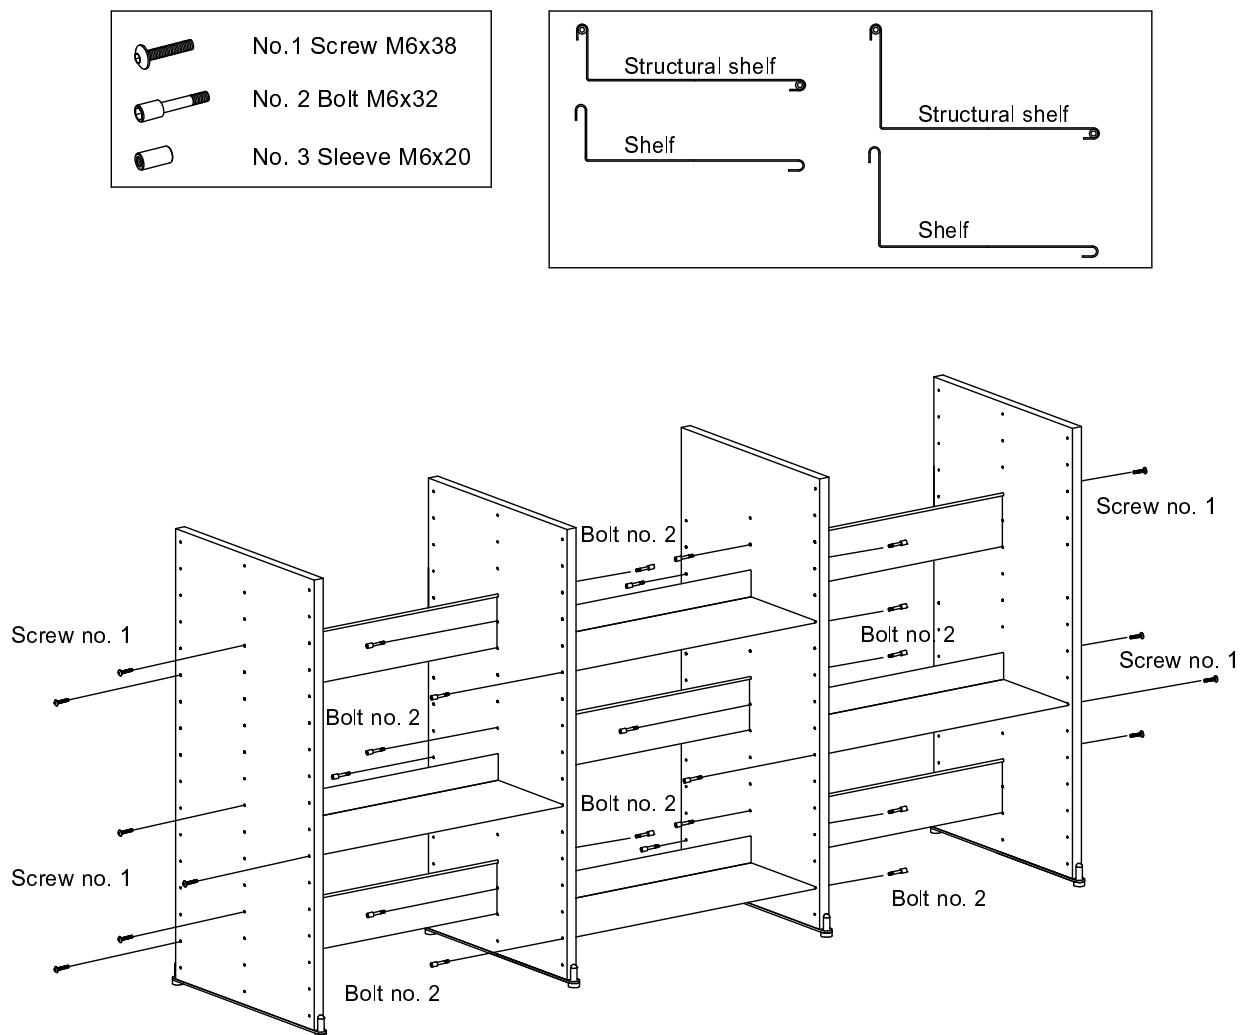

Before starting to assemble...

Always look at the packing notes.

In the packing note you will find important information regarding measurements and how many of each part every position needs.

Accessories such as top shelf to be installed according to separate instructions.

This is a general instruction and it shows how to assemble a shelf with height 1084 mm.

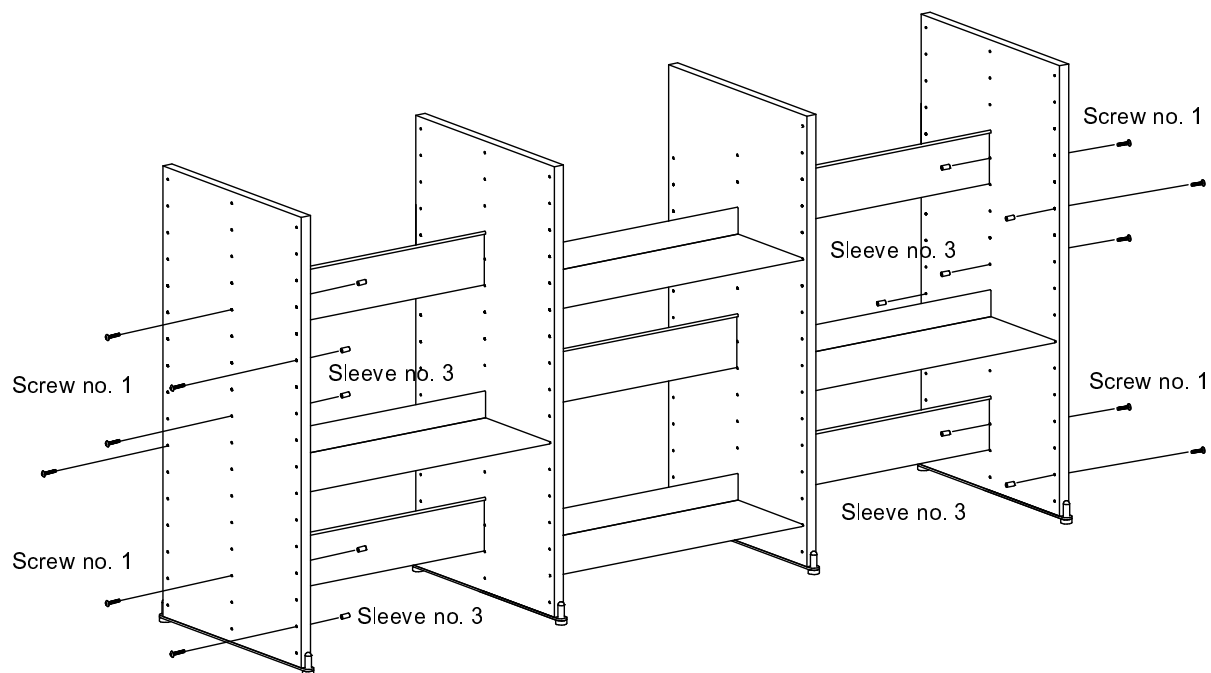

1.

Assembly the upper and lower structural shelves with high back to the end panel. On the opposite side in the 7:th hole from the bottom, a structural shelf with low back. Use screw no. 1.

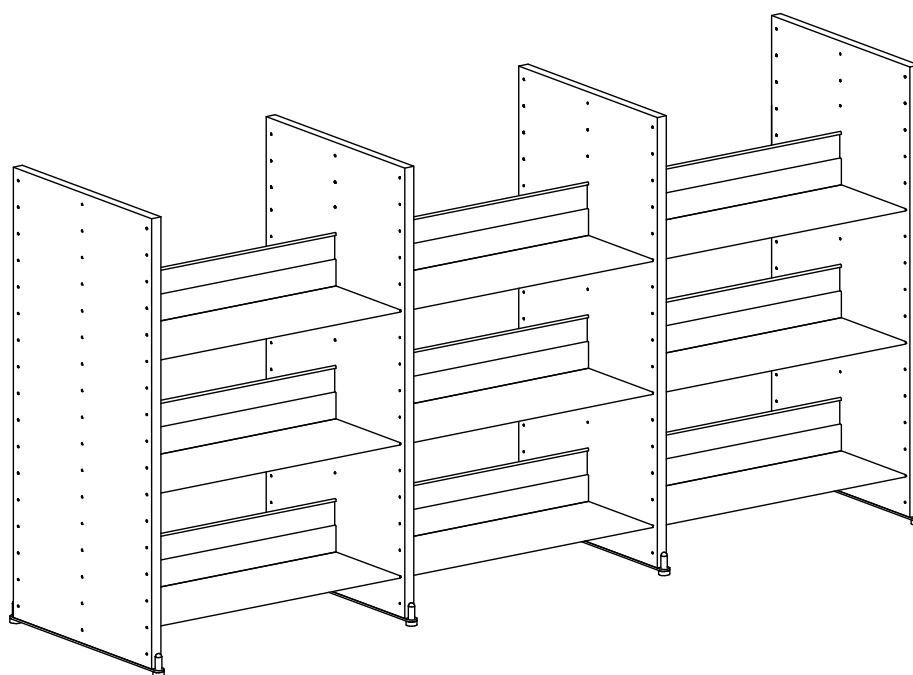

Position the next upright and screw it to the structural shelves, use bolt no. 2.

Alternate up and down, until the required number of sections are assembled. Finish with screw no. 1. (See picture above).

2.

Connect sleeve no. 3 with screw no. 1 in the end panels, (every fifth hole at standard).

3.

Place the loosen shelves.

First locate the shelf front, then lower the back into place.

Assembling is completed.
