

Assembly instructions - Book return 1

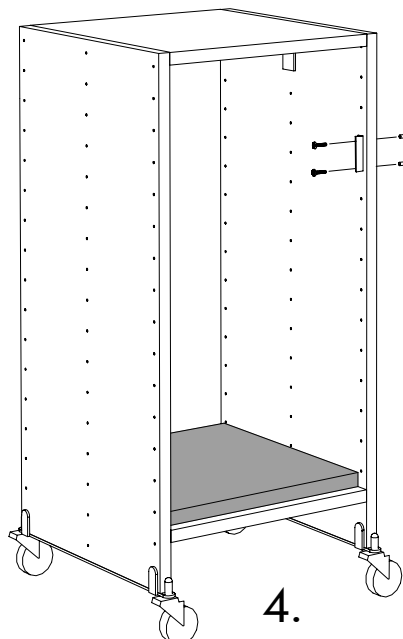

1.

Assembly the panels with connecting bars in the two upper and lower holes. Use M6x32 mm screw (8 pcs). Don't tighten the screws complete.

2.

Fix the metal bracket in the sides of the top and bottom board. Assembly the boards with M4 socket and screw in the upper and second lower hole. Now tighten the screws for the connecting bars.

3.

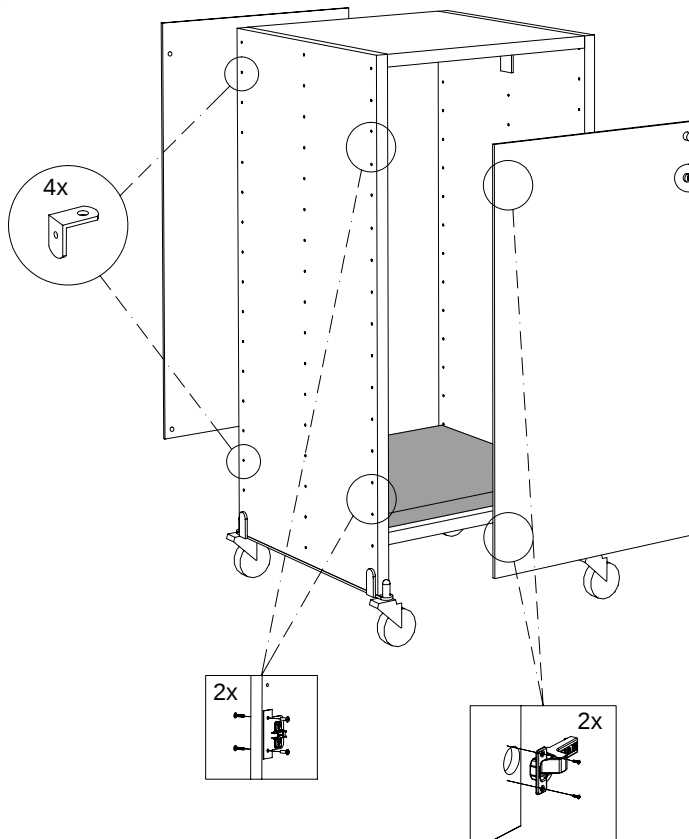

Fix the lock tin with M4 socket and screw in the fourth and fifth hole.

4.

Place the soft foam rubber on the bottom board.

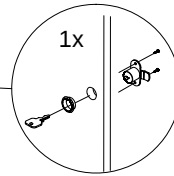

5.

Assembly the back with 4 metal angles. Use M6 screw and nut.

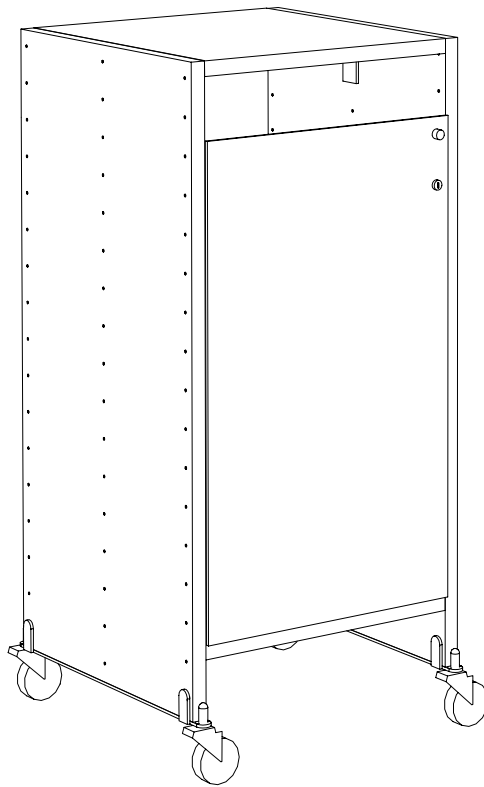

6.

Assembly the lock so the bolt will fix the ring in the hole.

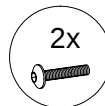

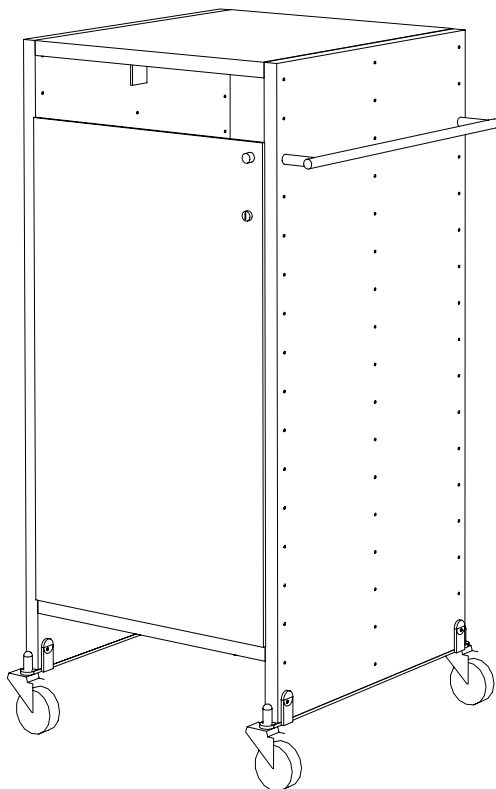

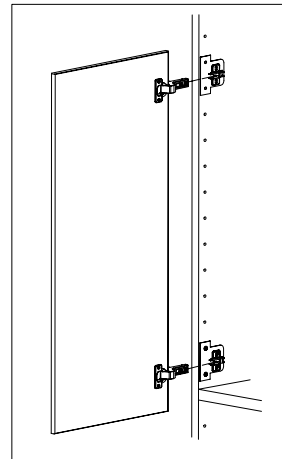

7.

Connect the assemblage plate to the panel, use M4 socket and screw. Put the hinges in the holes on the doors, use screw 3x12 to fix it.

8.

Connect the hinges to the hinge holders.

9.

Fix the handle with M6 screws.
