## LITTBUS DOORS

|                                                                                   |        |              |                                                                                   |                                                                                    |                                                                                     |
|-----------------------------------------------------------------------------------|--------|--------------|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|  | No. 9  | Socket M4x15 |  |  |  |
|  | No. 10 | M4x20        | Hinge hold                                                                        | Hinge                                                                              | Assemblage plate                                                                    |
|  | No. 11 | Screw 3x12   |                                                                                   |                                                                                    |                                                                                     |
|  | No. 16 | M4x6         |                                                                                   |                                                                                    |                                                                                     |

**1.**

First put the hinge hold to the assemblage plate.  
Use **screw no. 16**.

**2.**

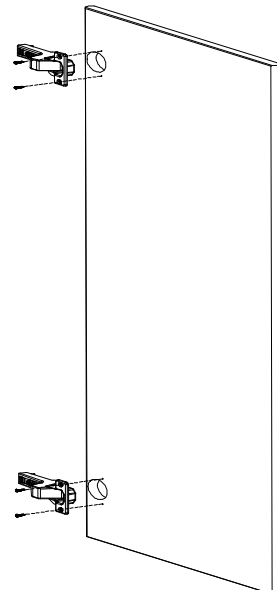

Connect the assemblage plate to the panel with **socket no. 9**  
and **screw no. 10**.

The arrow on the hinge hold should point to the front.

**3.**

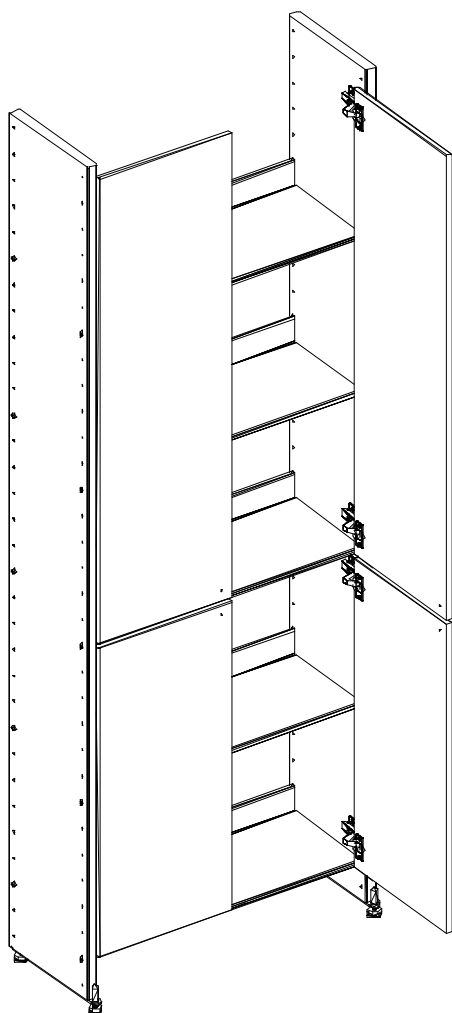

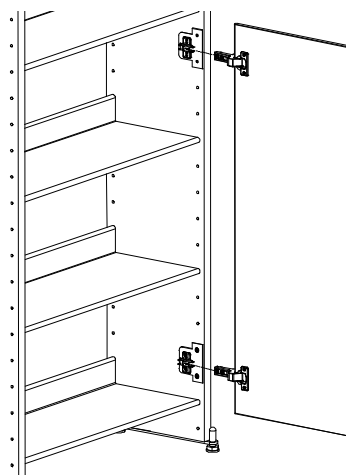

Put the hinges in the holes on the door,  
use **screw no. 11** to fix them.

**4.**

Connect the hinges to the hinge holders.

To make it easier you can loose the screws (a little) that keeps the hinge hold fixed to the assemblage plate. (Don't forget to draw tight again).

**5.**

Adjust the doors with the screw on the hinges.
