

MagniLink Vision

Lots of possibilities for work, home and school

MagniLink Vision comes with an ergonomic, integrated control panel with tactile buttons and / or knobs within a comfortable reach. MagniLink Vision has a large monitor*, providing excellent image quality, and is available with a smooth, ergonomic A3 X/Y-table with smooth edges and friction brakes.

The Visions can be adapted to all users' needs, regardless of whether the system is to be used at school, at home or at a workplace. A high quality camera with Full HD, a low vision-adapted monitor and dimmable lights ensures perfect conditions for light-sensitive users with visual impairments.

Text-to-Speech
The optional Text-to-Speech (TTS), offers the best of both worlds – a high-quality reading camera and a reading machine in the same product. TTS provides increased reading speed, improved comprehension, and less eye fatigue which creates an overall better reading experience. TTS must be ordered from the start since it is factory installed.
