CONTROL YOUR HOT TUB FROM YOUR SMART DEVICE

## THE NEW FEATURES

### New! Chromazon3™ Lighting

Now you can take your lighting to the next level and easily surround yourself with relaxing, calm colors or energetic party light show. Now available through ControlMySpa™ on your smart device.

### New! Panel Lock Feature

Prevent unwanted use or temperature adjustments. Locking the panel feature prevents the controller from being used, but all automatic functions are still active.

### New! Chromazon3™ Lighting

Easily manage scheduling anytime, any day of the week so your tub is ready when you are. Set the temperature, the mode and the range. It's the details that matter.

### New! MicroSilk® Pump Control

Look younger, feel better with MicroSilk® Hydrotherapy. Activate the MicroSilk® pump through your smart device. Available through the ControlMySpa™ app.

### New! Ready/Rest Support

Be sure your spa is heated and ready to enjoy when you want to take a soak. Switch between Ready or Rest Mode from your smart device and keep the water temperature within 1° F (0.5° C) of the set temperature.

### New! High/Low Range Support

Switch between High or Low in the temperature range settings. The water temperature can be set between 80° - 104° F (26.6° - 40.0 C) when the Temp Range is set to High or 50° - 99° F (10.0° - 37.2° C) when Temp Range is set to Low.

## THE BENEFITS

### For the Spa Professional:

#### Peace of mind for your customer

(Upsell remote monitoring)

#### Like being onsite

(Access to all spa information and real-time operational data)

#### Push notifications and messaging

(Problem alerts & error codes)

#### Diagnose the fix before you arrive

(Know what parts you need)

### For the Homeowner:

#### New! Easy to use app

(No access fees)

#### Latest Wi-Fi technology

(Better coverage)

#### Alerts and reminders

(Custom events)

# ControlMySpa™

CONTROL YOUR HOT TUB FROM YOUR SMART DEVICE

## EVERY DETAIL OF CONTROLMYSPA™ IS CUSTOM DESIGNED

### Step 1: Log-in

Spas are automatically created in the digital database when the homeowner first logs in.

### Step 2: Monitoring the spa

Once logged in, the spa is then connected to the OEM and the Dealer for monitoring, so your spa will always be just right.

### Step 3: No pressure setup

Specially engineered so there is no burden placed on the OEM or the Dealer to set-up accounts.

## PLUG N' PLAY WITH THE GATEWAY ULTRA

Ultra long range, ultra easy to setup and ultra secure communications

## INSTALLATION

For further instructions on the installation process for the hot tub please visit:  
[www.balboawater.com/CMS-Installation](http://www.balboawater.com/CMS-Installation)

### Designed to work for any home

Just follow the instructions and let the Gateway Ultra go to work. Easily manage the setup with just a few quick taps.

### Small and inconspicuous

Ultra small and easy to hide near your router without losing the signal. No WiFi necessary. Uses only secure proprietary RF.

### Ultra effortless to install and support

The Gateway Ultra works seamlessly with Balboa's powerful BP technology. Compact, reliable and secure, the Gateway Ultra is simple to install and support.
