

MOTOR-DRIVEN TURN TRACK

WD-C90

- Compact 90° solution for efficient corner placement
- Motor-driven operation for smooth and reliable rack flow
- Compatible with all standard 50×50 cm racks
- Plastic drive chain for gentle and stable rack transport
- Equipped with emergency stop for increased safety
- Manufactured entirely in stainless steel
- Can be installed on inlet or outlet side
- Stainless steel frame with adjustable feet
- Electrical connection: 400V 3N~ 50Hz 0,12kW

ART NR	DESCRIPTION	LxWxH
3-4556H	90° motor-driven turn track, R-L	800x800x890
3-4556V	90° motor-driven turn track, L-R	800x800x890

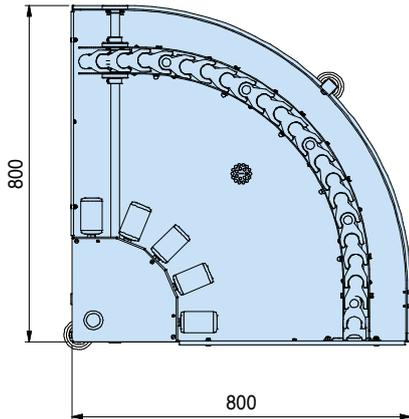

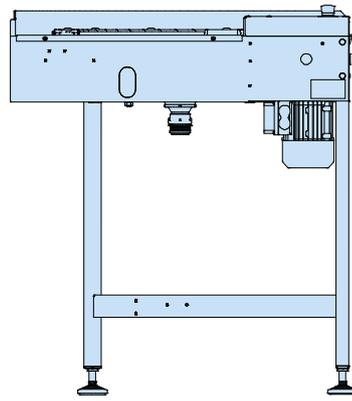

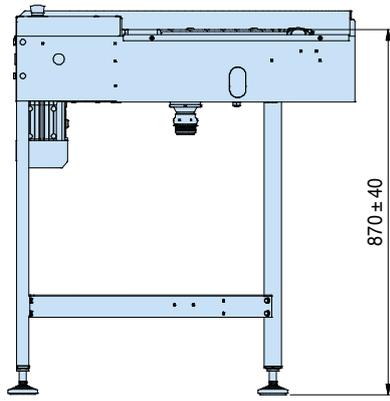

WD-C180

- 180° solution for efficient rack flow reversal
- Motor-driven curve for stable and controlled rack transport
- Designed for all standard 50×50 cm racks
- Plastic drive chain ensures smooth and consistent feeding
- Equipped with emergency stop
- Fully stainless steel construction
- Can be connected directly to the machine or via a straight section
- Stable frame with adjustable feet
- Electrical connection: 400V 3N~ 50Hz 0,12kW

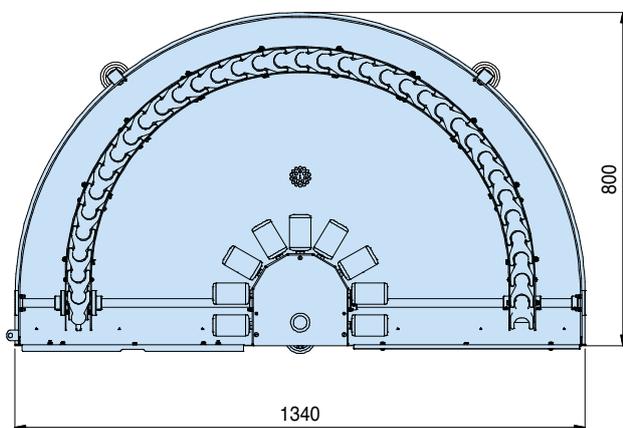

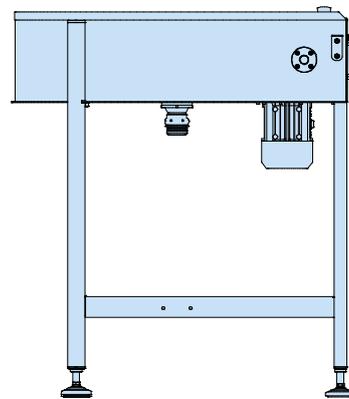

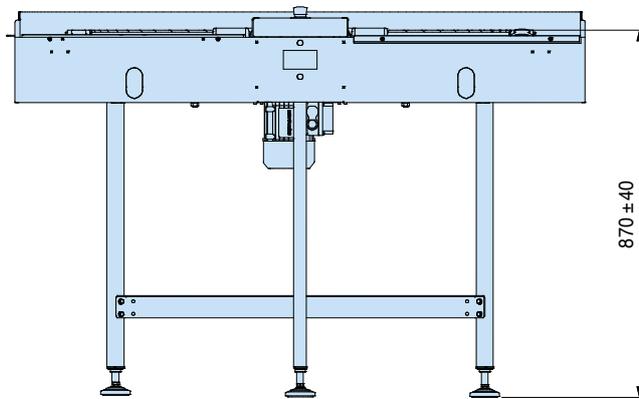

ART NR	DESCRIPTION	LxWxH
3-4557H	180° motor-driven turn track, R-L	800x1340x890
3-4557V	180° motor-driven turn track, L-R	800x1340x890

90° motor-driven turn track
