

Energy transition: what does it mean for Norway?

Challenges and
opportunities from CEO
to offshore workers

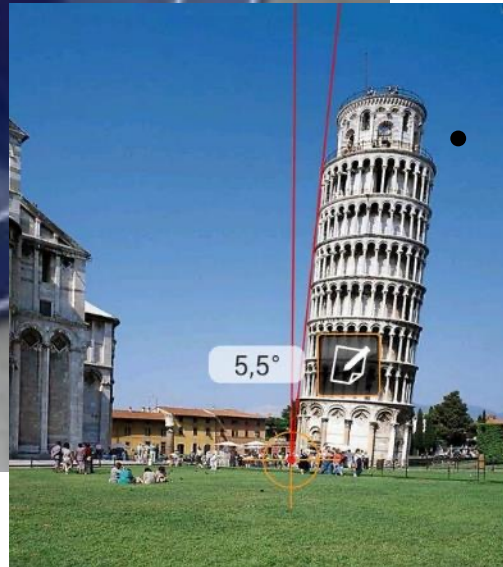

Catherine Adams,
Director SAP & New Technologies

Skråtårnet 1 Tower

- **Built as challenge and model**
- **Unique design and construction**
- **Symbol of Norway's innovation**

The Energy Transition in Norway

Norway: a Leader

- **Carbon-neutral by 2030**
- **Significant progress in renewables**
- **Example for other countries**
- **Energy Security for Europe**

If you think you're a leader and you turn around and no one is following you, then you're simply out for a walk.

James M. Kouzes

Collaboration and Innovation

- Key to energy transition success
- Government and private sector
- Global and local initiatives

Technology as Key Enabler

- **Improves energy efficiency and renewables**
- **Most technology already exists, some emerging tech**
- **Enables sustainable future**

SAP S/4HANA Cloud Solutions for Sustainability

- **Reduce environmental impact**
- **Benefits for sustainability**
- **Real solutions**

SAP S/4HANA Cloud Solutions for Sustainability

Solution Name	Description
SAP Ariba	Procurement management, sustainable sourcing, supply chain sustainability
SAP SuccessFactors	Remote work, carbon footprint reduction, energy shift
SAP Analytics Cloud	Energy monitoring, waste reduction, sustainability
SAP Asset Intelligence Network	Asset management, energy efficiency, downtime reduction
SAP Extended Warehouse Management	Warehouse optimization, energy efficiency, waste reduction
SAP Transportation Management	Transportation optimization, emissions reduction, energy shift
SAP Fieldglass	Workforce management, remote work, sustainability
SAP S/4HANA Finance	Financial management, waste reduction, resource allocation optimization, sustainability
SAP Environment, Health, and Safety Management	Environmental management, regulatory compliance, sustainability, energy management

SAP's Initiatives for sustainability

- SAP's nextgen innovation community
- SAP.iO Foundry for Sustainable Future

Challenges and Opportunities for CEOs in the Energy Transition

Challenges for the modern CEO

Balancing financial pressures with sustainability

Navigating complex regulations

Consumer demand for sustainability

Talent

Keeping up with emerging tech

Global market

Opportunities

Invest in sustainable practices

Demand for sustainable products and services

Emerging technologies

Sustainable branding

Create partnerships and stakeholders

Offshore Workers

Challenges and Opportunities for Offshore Workers

Challenges for offshore workers

Job security and uncertainty

Adapting to new skills

Safety

Sustainability conversation

Public perception

Opportunities for offshore workers

New job opportunities
in renewables

Training and upskilling

Successful transition
programs

Improve public
perception

The Future of Energy in Norway

A Greener and More Sustainable Future for Norway and the World

The energy transition in Norway will have a global impact and influence other countries to shift towards renewable energy sources

Taking Bold Action

**towards a
Sustainable Future**

“If I have seen further than others, it is by standing upon the shoulders of giants,”

Isaac Newton

Thank you!

**The world is how
we shape it.**
