Consulting

2BM MOBILE WORK ORDER.

BlueWorx packaged EAM solution

BlueWorx provides an intuitive user experience, using the latest SAP Fiori[®] UX across **mobile**, **tablet** and **desktop**. BlueWorx works fully offline allowing you to continue to work when your connection doesn't.

BlueWorx

S⁵ Consulting

Base functionality:

- Work and service orders
- Notifications
- Comprehensive asset inspections
- Functional location details
- Equipment details
- Material balances, issues, reservations and exchange
- Measurement reading list
- Measurement points
- Measurement documents
- Bills of materials
- Documents
- Optional Google map and Esri map integration

Consulting BlueWorx

CONFIGURATION AND ADMINISTRATION SITE

A fully featured BlueWorx configuration and administration online site is provided including:

- Core settings
- Licence settings
- User profiles and users
- Inspections
- Maps
- Translations
- Crew component
- Synchronisation logs
- Work Order status
- Inspection logs
- Material processing logs

BLUEWORX IS FULLY EXTENSIBLE - BECAUSE NOT EVERYONE IS THE SAME

In a user focused solution the tool should adapt to the user and not the other way round.

Validated requirements with ROI can be accommodated through enhancement of the standard BlueWorx product. It's been designed that way.

ຣັ

Areas more likely to involve customer specific delivery generally involve:

- External systems integration
- Pre-existing SAP customisations that are still effective and necessary
- Business or industry specific business process rules

Consulting

Experienced turnkey provider

4700 employees

Annual turnover of **NOK 12 billion**

Presence in Norway, Singapore and Thailand

Haugesund yard Norway

- Construction of new platforms and topside modules
- Maintenance and modifications of offshore and onshore facilities and modules
- Yard-stay services
- One of Norway's largest indoor assembly facilities
- Largest dry dock in Northern Europe

Facts about Haugesund yard

- 234,000 m2 fabrication, assembly and ISPS area (International Ship and Port Facility Security)
- Indoor production, storage space, offices, accommodation, surface protection shops, canteens, training centre, outdoor storage and assembly areas
- Full-service yard
- Electrical, instrumentation, telecom, automation, welding, NDE, machining, completion and mc/commissioning
- Lifting capacity
- Indoor: 300 tons

- Outdoor: 75 tons
- Load-out jetty: 65 x 60 m
- Bearing capacity: 40t/m2
- Quay area: 600 m
- Quayside water depth: 8 25 m
- Access controlled facility
- Rigs can be moored quayside
- Area for assembly of decks 200 m from the quay at about 50 m depth

Project background

- Need for a mobile solution on top of Aibel SAP PM ECC HEC
- Neptune DXP SAP Edition already in use in Aibel since 2018 for WM and TM processes.
- S5 Consulting and Aibel evaluated different solutions but choose BlueWorx
- Scope : Enable Maintenance workers to processes notifications and workorders in an offline scenario using tablets.
- Project established Q3 2021
- Go Live Q3 2022

Project experiences

- Some bugs in the BlueWorx solution, but good attention from ZAG support.
- BlueWorx new to S5 Consulting adding time to Go Live.
- Aibel SAP PM ECC setup «standard» but with room for improvements to maximize BlueWorx performance.
- Aibel internal resources in Haugesund was in a high activity period at Yard, so the project needed to take this into account
- BlueWorx has functionality beyond initial Aibel scope, like inspections and measurement. Inspections was included in the Aibel setup with minimal extra cost.
