The Next Era of SAP Business Data Cloud

Discover SAP Business Data Cloud in 2026

JANUARY 29, 2026 / 16:00 – 17:00 CET

Kick off The Next Era of Business Data with an overview of SAP Business Data Cloud in 2026. In this live session, we explore how SAP BDC is evolving into a trusted, open foundation for analytics, AI, and decision-making, and what that evolution means for organizations planning their data strategies today. **Klaus-Peter Sauer, Senior Director Data Warehousing, SAP**

The Smart Transitioning Path to SAP BW Modernization

FEBRUARY 05, 2026 / 16:00 – 17:00 CET

In this overview session, we explore why organizations should modernize their SAP BW landscapes and how they can do so with confidence. You'll gain a clear, practical view of the available modernization paths, from system conversion and selective transition to integration with SAP Business Data Cloud, along with the key business and technical trade-offs behind each option. **Sandy Tran, Product Manager SAP BDC, SAP**

The Next Era of SAP Business Data Cloud

From Data Silos to Business Insight: The Power of BDC Connect

MARCH 12, 2026 / 16:00 – 17:00 CET

In this live session, discover how BDC Connect expands the open data ecosystem by enabling secure, zero-copy data access across platforms. Built on industry standards with a focus on Delta Sharing, BDC Connect allows organizations to integrate SAP Business Data Cloud seamlessly with external data platforms such as Databricks and Snowflake, while preserving governance, semantics, and trust. **San Tran, Product Manager SAP BDC, SAP**

An Architect's Blueprint for SAP BDC as the Foundation for Enterprise AI

MARCH 19, 2026 / 16:00 – 17:00 CET

As enterprise and data architects, we're tasked with bridging the gap between strategic vision and technical reality. SAP Business Data Cloud represents a shift in how organizations architect for business context, governance, and AI-readiness across SAP and Non-SAP ecosystems. In this session, we cut through the marketing to provide architects with a pragmatic, pattern-based view of SAP BDC's role in modern enterprise architecture. **Gaurish Dessai Principal Enterprise Architect, SAP**

Design. Govern. Deliver. Data Products with Data Product Studio

MARCH 26, 2026 / 16:00 – 17:00 CET

In this live session, we introduce SAP Data Product Studio, a new capability in SAP Business Data Cloud designed to help developers and data teams build, manage, and govern data products at scale. You'll see how a visual workspace makes it easier to model and enrich custom data products across SAP and third-party sources, without losing control over semantics, performance, or trust. **Fenja Schulz, Product Manager SAP BDC, SAP**
