SAP INTEGRATION SUITE IN 2026

Discover how SAP Integration Suite, SAP's enterprise-grade Integration Platform as a Service (EiPaaS), helps organizations connect complex hybrid and multi-cloud landscapes with speed and confidence. From APIs and processes to data, events, B2B partners, and agentic AI, it delivers a unified, business-centric integration approach. This session covers core capabilities, real-world use cases, and 2026 innovations such as AI-assisted and event-driven integration, prebuilt content, enhanced governance, and roadmap insights to support clean-core, resilient, and future-ready integration strategies.
