Junior Consultant

PEARL GROUP

- Established in 2006 with the idea of delivering template-based solutions from SAP and Hybris
- Largest SAP partner in Norway, and in total, more than 200 employees located across 6 different office locations
- Experiences from 13 SAP S/4HANA implementations, many of them with embedded EWM:
 - Fjellspport
 - Motek
 - Bohus
 - Outnorth

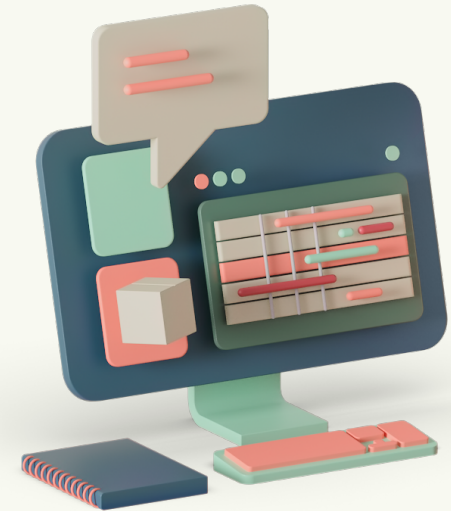

EMBEDDED ANALYTICS

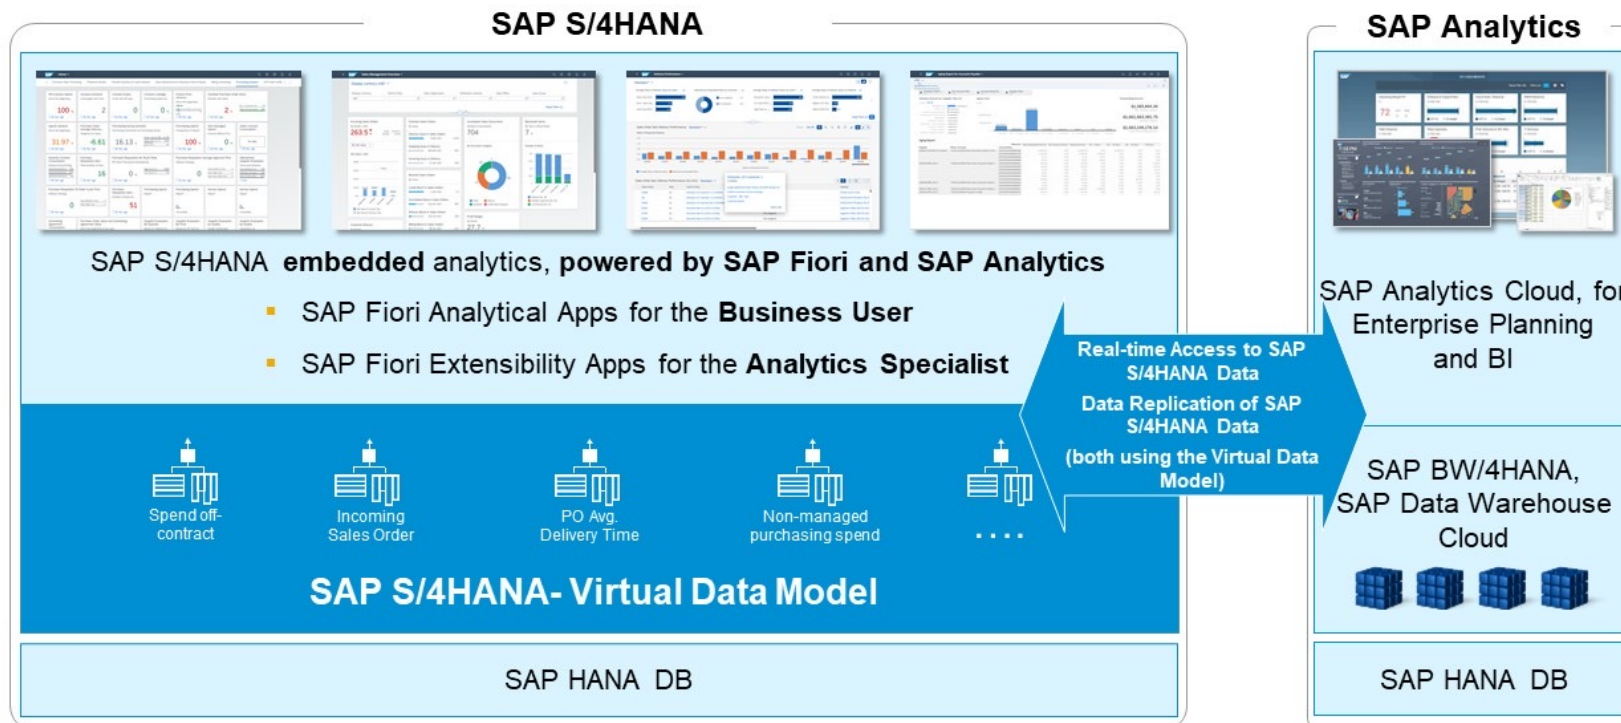

EMBEDDED ANALYTICS

- S/4 HANA embedded analytics is direct real-time analysis in S/4 HANA using Fiori applications
- Today, many business handle transactions and analytics separately
 - Embedded analytics gives you the possibility to work with both simultaneously

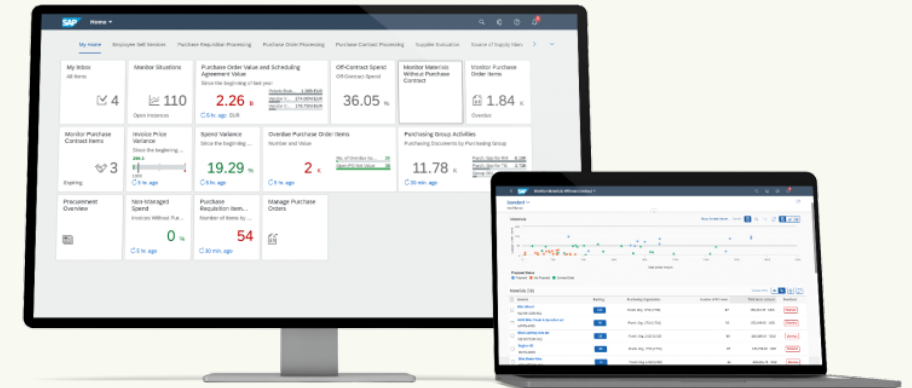

SAP S/4HANA Analytics Overview

EMBEDDED ANALYTICS

- In order to leverage embedded analytical capabilities, SAP provided the SAP Fiori user experience (UX)
- SAP Fiori gives the end user consistency, and a single source of truth. The different apps gives the opportunity to:
 - Personalization
 - Sharing
 - Filtering
 - Data export
 - Pivoting
- Capabilities available in SAP Fiori include:
 - Multidimensional reports
 - The Smart Business Framework
 - Analytical Fiori applications

EMBEDDED ANALYTICS

- So how easily can embedded analytics create value for you?
 - 1) Just log on your SAP Fiori Launchpad
 - 2) Use the different out-of-the-box applications to display the current status of your business at a glance
 - 3) Take actions by using the interactive graphs and lists, drilling down to specific scenarios, sharing insight with your colleagues

CUSTOMER EXPERIENCES

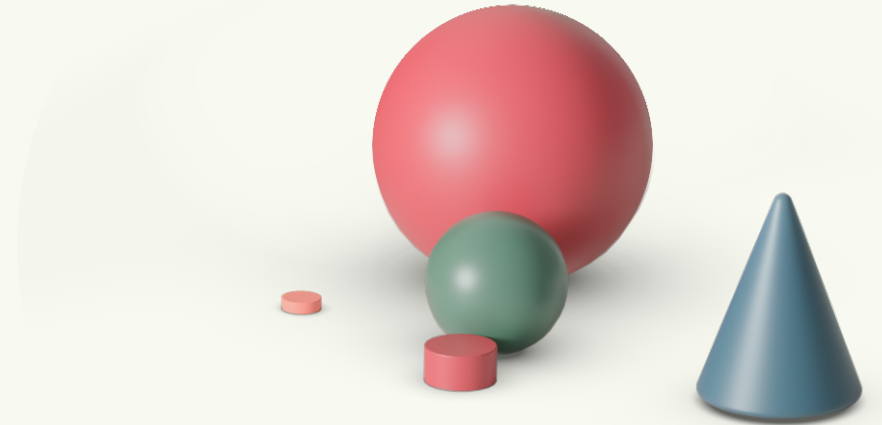

RAISE GRUPPEN

- Raise Gruppen AS is one of Europe's largest hairdressing corporations, with over 150 salons, four hairdressing schools, an inspiration center, a business academy, and more than 1000 employees in Norway, Sweden, and the US
- In Norway, Raise Gruppen is better known for their salon brands; Nikita Hair and Sayso Hair & Style

RAISE GRUPPEN: SOLUTION

- Raise Gruppen recently went live with a S/4 HANA Cloud Extended Edition solution, running on a cloud-based platform from Microsoft Azure
 - Currently running on SAP S/4HANA 1909
 - SAP Fiori 3.0
- Once again Pearl is in front when it comes to releasing new solutions in our market

RAISE GRUPPEN

Challenges

1. Ever since the start in 1984, old and new solutions have piled up. As the company has grown, solutions have been added, and more and more salons and units have been connected to the system
2. The technical environment has grown more complex, resulting in the need to clean up and replace the core solutions to optimize and streamline the workflow

Solution

1. Raise Gruppen have centralized all their data in SAP S/4HANA, enabling the possibility to report on live transactional data, solely using SAP Fiori as an interface
2. Raise can today, by the help of out-of-the-box analytic apps, analyze and report on the most important parts of their supply chain

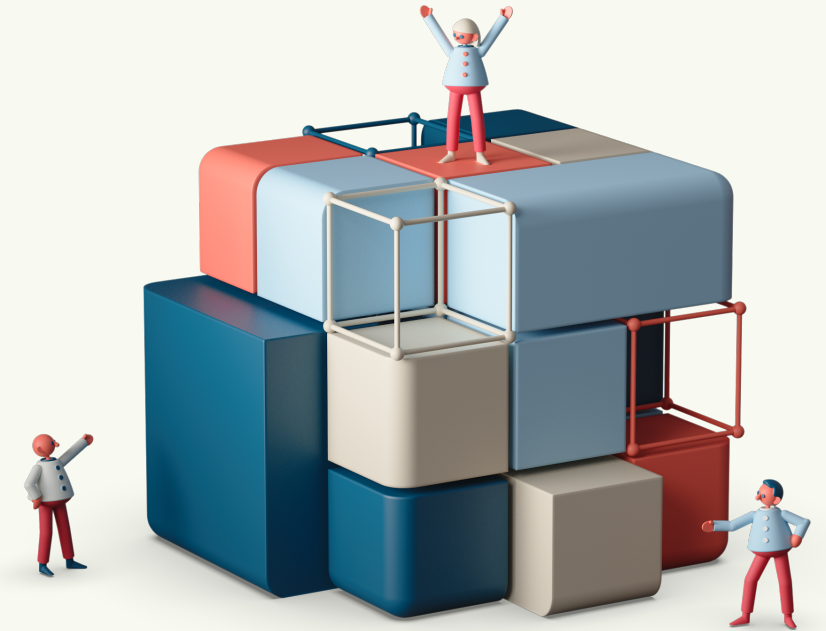

JYSK BALTIC & BELARUS

- JYSK is multinational retail company of Scandinavian products within sleeping and living
- In Baltics & Belarus, Jysk have more than 40 stores, and ambitious growth plans

JYSK BALTIC & BELARUS: SOLUTION

- Jysk Baltic & Belarus are currently implementing SAP S/4HANA, running on a platform hosted by Telia
 - SAP S/4HANA 2020
 - SAP Fiori 3.0

JYSK BALTIC & BELARUS: CHALLENGES

Challenges

- 1) Several decisions are made based on incorrect data, leading to hours of unnecessary problem solving
- 2) Employees are spending a high amount of time on gathering and analyzing data
- 3) The inventory of each store are not easily accessible in the system

Solution

- 1) SAP provides real-time data, presented through out-of-the-box Fiori applications
- 2) The data is automatically gathered, analyzed and presented to the end user
- 3) Real time inventory data is available through several out-of-the-box apps

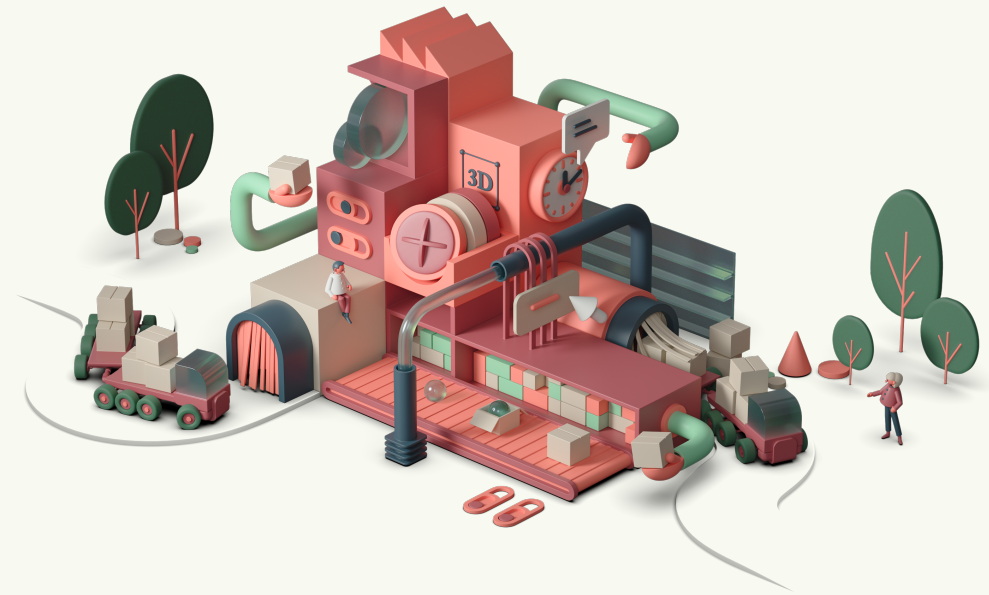

VINMONOPOLET

- Vinmonopolet is a Norwegian government-owned alcoholic beverage retailer
- In total, 337* stores
- *= pr 01.01.2021

VINMONOPOLET: SOLUTION

- Vinmonopolet is currently running on SAP S/4HANA 1909, after being migrated by Pearl in 2020
- This year, Pearl implemented various embedded analytics apps, enabling Vinmonopolet to explore the possibilities within SAP Fiori
