For all recent and planned innovations, potential data protection and privacy features include simplified deletion of personal data, reporting of personal data to an identified data subject, restricted access to personal data, masking of personal data, read access logging to special categories of personal data, change logging of personal data, and consent management mechanisms.

Organisations Face the Challenge of an Ever-Changing Process Landscape

Three key factors are driving the change

**Volatile
Markets**

**Limited
Resources**

**Complex
IT Landscapes**

smart

End-to-end
Business Process Intelligence
from insight to action

simple

Quick time to value with
low-code/no-code automation
for everyone

scale

Scale automation
of any core business application
with intelligence

SAP

At SAP, the automation and optimization of Business Processes at large scale has been our DNA **since 1972.**

Only SAP makes Process Automation accessible for everyone to build and run business-critical automations on core systems.

We help our customers **innovate** their Business Processes in an ever-changing world!

Process design, documentation and governance

Process mining (across SAP & non-SAP systems)

Journey Modelling

Collaborative business transformation

A woman with curly hair, wearing a light blue and white plaid shirt over a grey top, is sitting in an office. She is smiling and looking up at a basketball balanced on her right index finger. She is also holding a black smartphone to her left ear. The background shows a blurred office environment with computer monitors, framed pictures on the wall, and a desk lamp. A large, bold, black text "DEMO" is overlaid on the left side of the image.

DEMO

Business process intelligence is an end-to-end transformation solution

Locate and prioritize process improvement potential for specific SAP systems

Repair and enhance processes to improve effectiveness and efficiency, and improve business user productivity

BPI **Improvement** with SAP **Intelligent** RPA

BPI

Improvement

Low code, RPA,
and workflow

Criteria for Selecting Processes for Automating with RPA

Manual & Repetitive

Consolidate and manipulate data from multiple data sources, e.g. MS Excel, vendor portal, SAP systems

High Volume

Handling process steps several times a day like copy & paste
e.g. data migrations, approvals

Multiple Systems

Access multiple applications during process execution, e.g. web application, ERP, non-SAP systems

Low Code/No Code User Experience

Simple browser-based bot building experience for citizen developers:

- Drag and drop editor
- Workflow builder
- No-code experience for simple use cases
- Event-based capture for bot-building
- Low-code experience with JavaScript
- State-of-the-art debugger
- Intuitive documentation and active developer community

SAP Intelligent RPA - Solution Overview

SAP Intelligent RPA

* prebuilt content available

** prebuilt content in the roadmap

The Forrester Wave™: Robotic Process Automation, Q1 2021

“SAP’s RPA solution is a strong alternative for SAP customers, particularly for enterprises concerned with bots disrupting core SAP systems and those usually needing the central SAP development team to design, develop, and maintain RPA for clear accountability, or for companies seeking a feature-rich RPA tool that comes with a broad ecosystem of partners.”

<https://news.sap.com/2021/03/forrester-rpa-solution-sap-strong-performer/>

A woman with curly hair, wearing a plaid shirt, is sitting in an office. She is smiling and talking on a mobile phone held to her ear with her left hand. With her right hand, she is balancing a yellow and grey ball on her index finger. The background shows a typical office environment with computer monitors, a desk, and framed pictures on the wall. A large, bold, black text 'DEMO' is overlaid on the image, partially obscuring the woman's torso and the desk area.

DEMO

Automatic Upload of **Bank Statement Files**

Executive Triggers Bot to
Download Bank Statement
Files from Email

Bot Reads email, retrieves
file and Stores them in a
local folder

Bot then runs the automatically upload
the input files as bank statements files
in the appropriate format

Bot Sends Email
to Stakeholders
with report

Automatic Upload of **Bank Statement File** Retrieving and Configuring the Bot
