THE SITUATION.

Support your digital warehouse strategy with one product

Mobile WAREHOUSE is ready out of the box but is created to grow with your progress & resources.

2BM Software's goal is to remove IT related complexity and to let Business set the agenda and IT have the insight to support.

SAP STANDARD TECHNOLOGY

Basics first

- Learning new ways of working
- Design thinking – Heavy user involvement
- Bring in standard products
- Remove complexity via tested UI/UX

Stick to standard

- No complicated middleware
- Offline
- Standard processes out of the box
- Security and infrastructure out of the box
- Your existing processes 1:1 in the app
- SAP STANDARDS and TECHNOLOGY 100 %
- FAST start - evolve your way

A man with grey hair, wearing a yellow safety vest over a grey shirt and a striped tie, is looking down at a mobile device in his hands. He is in a large warehouse with high ceilings and tall shelving units filled with boxes. Other workers in yellow safety vests are visible in the background, some carrying equipment. The scene is dimly lit, with the primary light source coming from the background, creating a silhouette effect on the man in the foreground.

WHAT IS 2BM MOBILE WAREHOUSE?

The next generation standard mobile software solution for SAP Warehouse

2BM Mobile Warehouse provides your warehouse workers with easy and intuitive access to essential warehouse tasks based on SAP Fiori design.

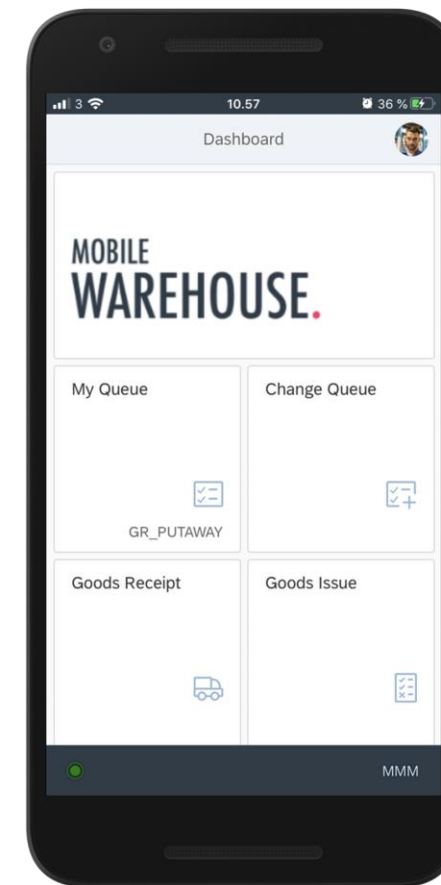

Built for optimal mobile scanning user experience

Available on any type of device – dedicated warehouse scanners, mobile phones, tablets or PC's

Works without continuous network connection – offline-data

Supports SAP MM-IM and WM. EWM support in 2209 release

Works on ECC or S/4 HANA and powered by SAP BTP

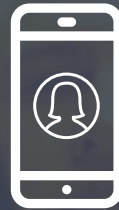

KEY TAKE AWAYS.

SAP Technology

Easy to Deploy
and Run

Easy and Flexible to
Customize, Maintain and
Upgrade

Works Offline

A construction worker wearing an orange safety vest over a dark blue shirt is seen from the side, holding a tablet computer. The background shows a construction site with various structures and equipment, all slightly blurred. The text "OUT OF THE BOX." is overlaid in white, with a small red dot at the end of the period.

OUT OF THE BOX.

SAP WM – Features

- Goods receipt
 - Purchase orders
- Inventory Count

 - Storage bin
- Cancel goods movements
- Multiple language support
- Offline data support
- Customisable eventbased barcode scanning framework
- Material images

A construction worker wearing an orange safety vest over a dark blue shirt is shown from the side, holding a tablet computer. The background is a blurred construction site with various structures and equipment. The word "DEMO." is overlaid in white text, with a small red dot at the end of the word.

DEMO.

2BM
SOFTWARE.

A person's hands are shown interacting with a tablet computer, which is placed over a set of architectural blueprints. The blueprints feature various lines, dimensions, and a small red house icon. Surrounding the tablet and blueprints are several drafting tools: a pair of black-rimmed glasses to the left, a yellow pencil and a black compass to the right, and a yellow and black tape measure at the bottom right. The entire scene is overlaid with a semi-transparent dark grey filter.

THANK YOU.

SUPPORT SLIDES.

A man with grey hair, wearing a suit and a yellow high-visibility vest, is looking down at a device in his hands. He is in a warehouse setting with high shelves filled with boxes in the background. Other workers in high-visibility vests are visible in the background, some pushing a pallet jack. The image has a dark, semi-transparent overlay.

CUSTOMER CASES.

CUSTOMER CASE: MITSUBISHI CHEMICAL.

- Two plants in United Kingdom
- Both SAP MM-IM and WM in same UI
- Deployment features:
 - Goods receipt
 - Inventory count
 - Stock lookup
 - Bin-to-bin movements (WM)
 - Material label print

2 B M M O B I L E W A R E H O U S E

CUSTOMER CASE: ROYAL UNIBREW.

- Four warehouses in the Baltics
- SAP WM
- Super efficient pallet movement
- Deployment features:
 - Bin-bin movement
 - Transfer order confirmation

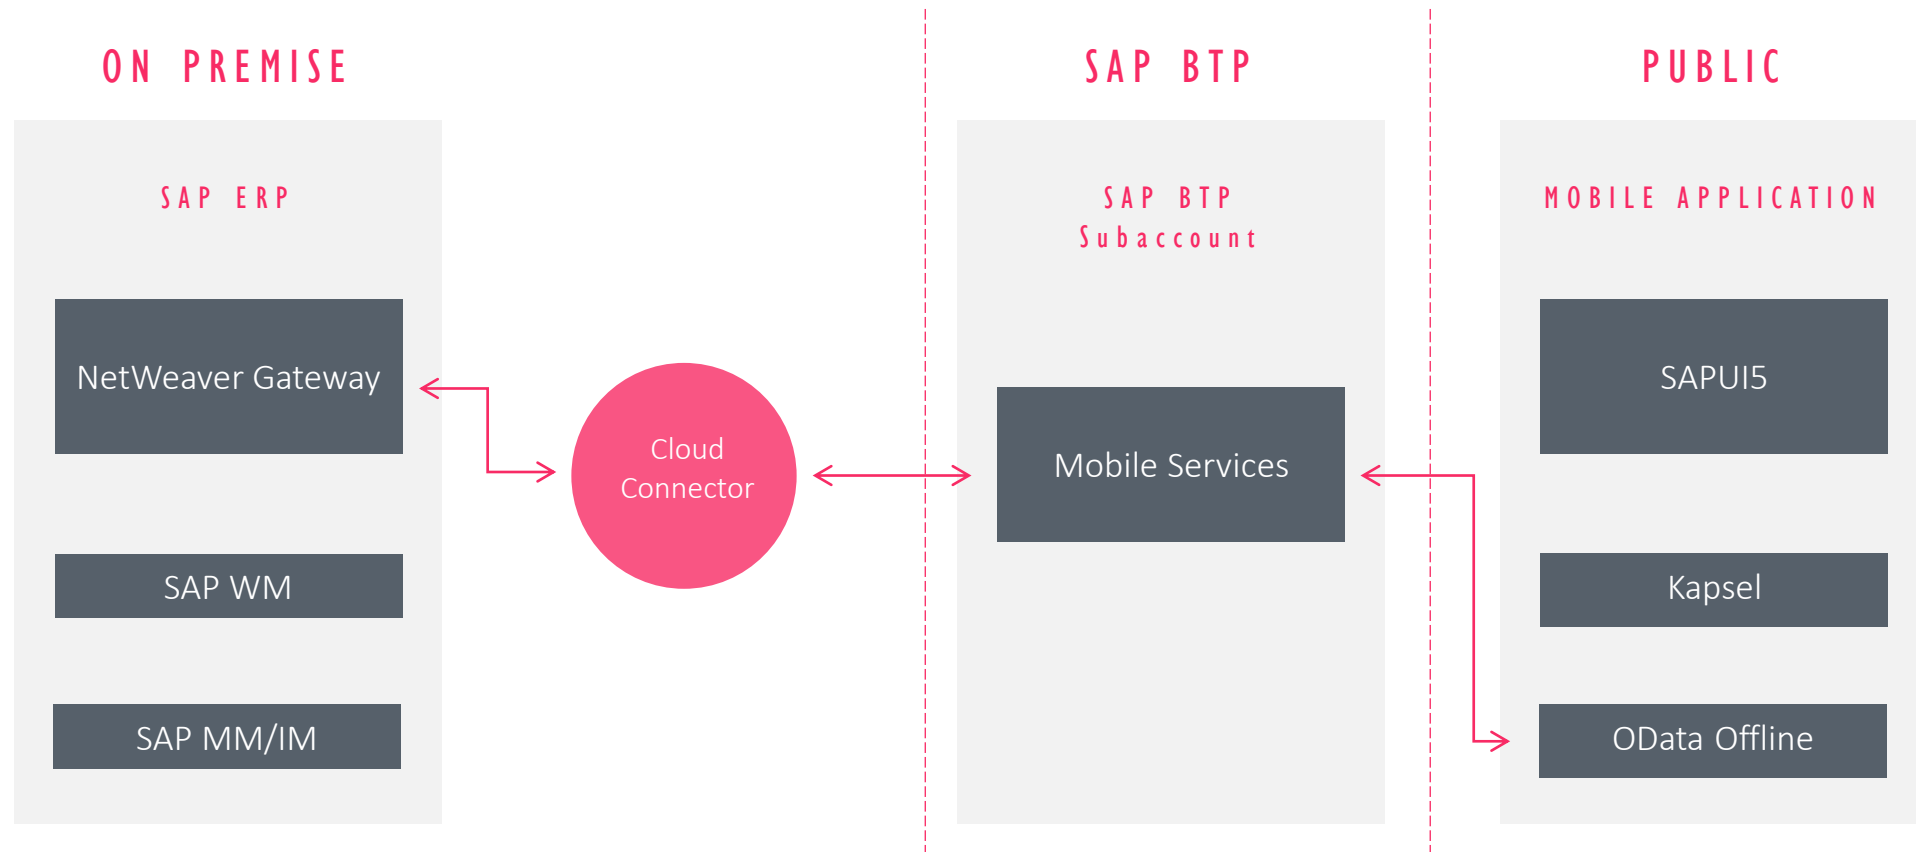

CUSTOMER CASE: NORDZUCKER.

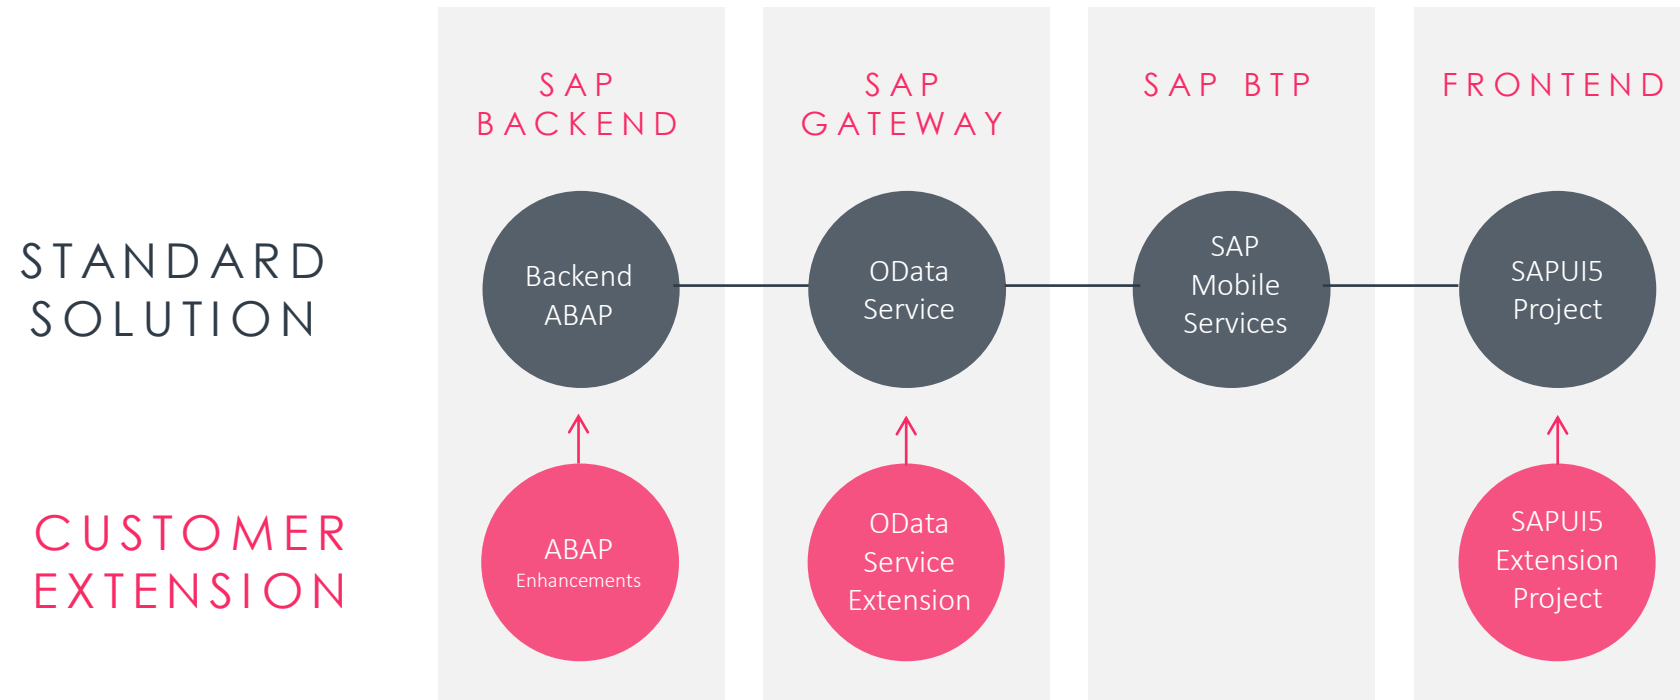

- 12 Plants in 6 countries
- SAP IM only
- Focused on sparepart storage locations
- Deployment features:
 - Goods receipt
 - Reservation picking
 - Employee pickup notifications
 - Purchase requisition creation
 - Stock transfer (SL-to-SL)
 - Return material to stock
 - Goods movement overview
 - Inventory count
 - Split valuation

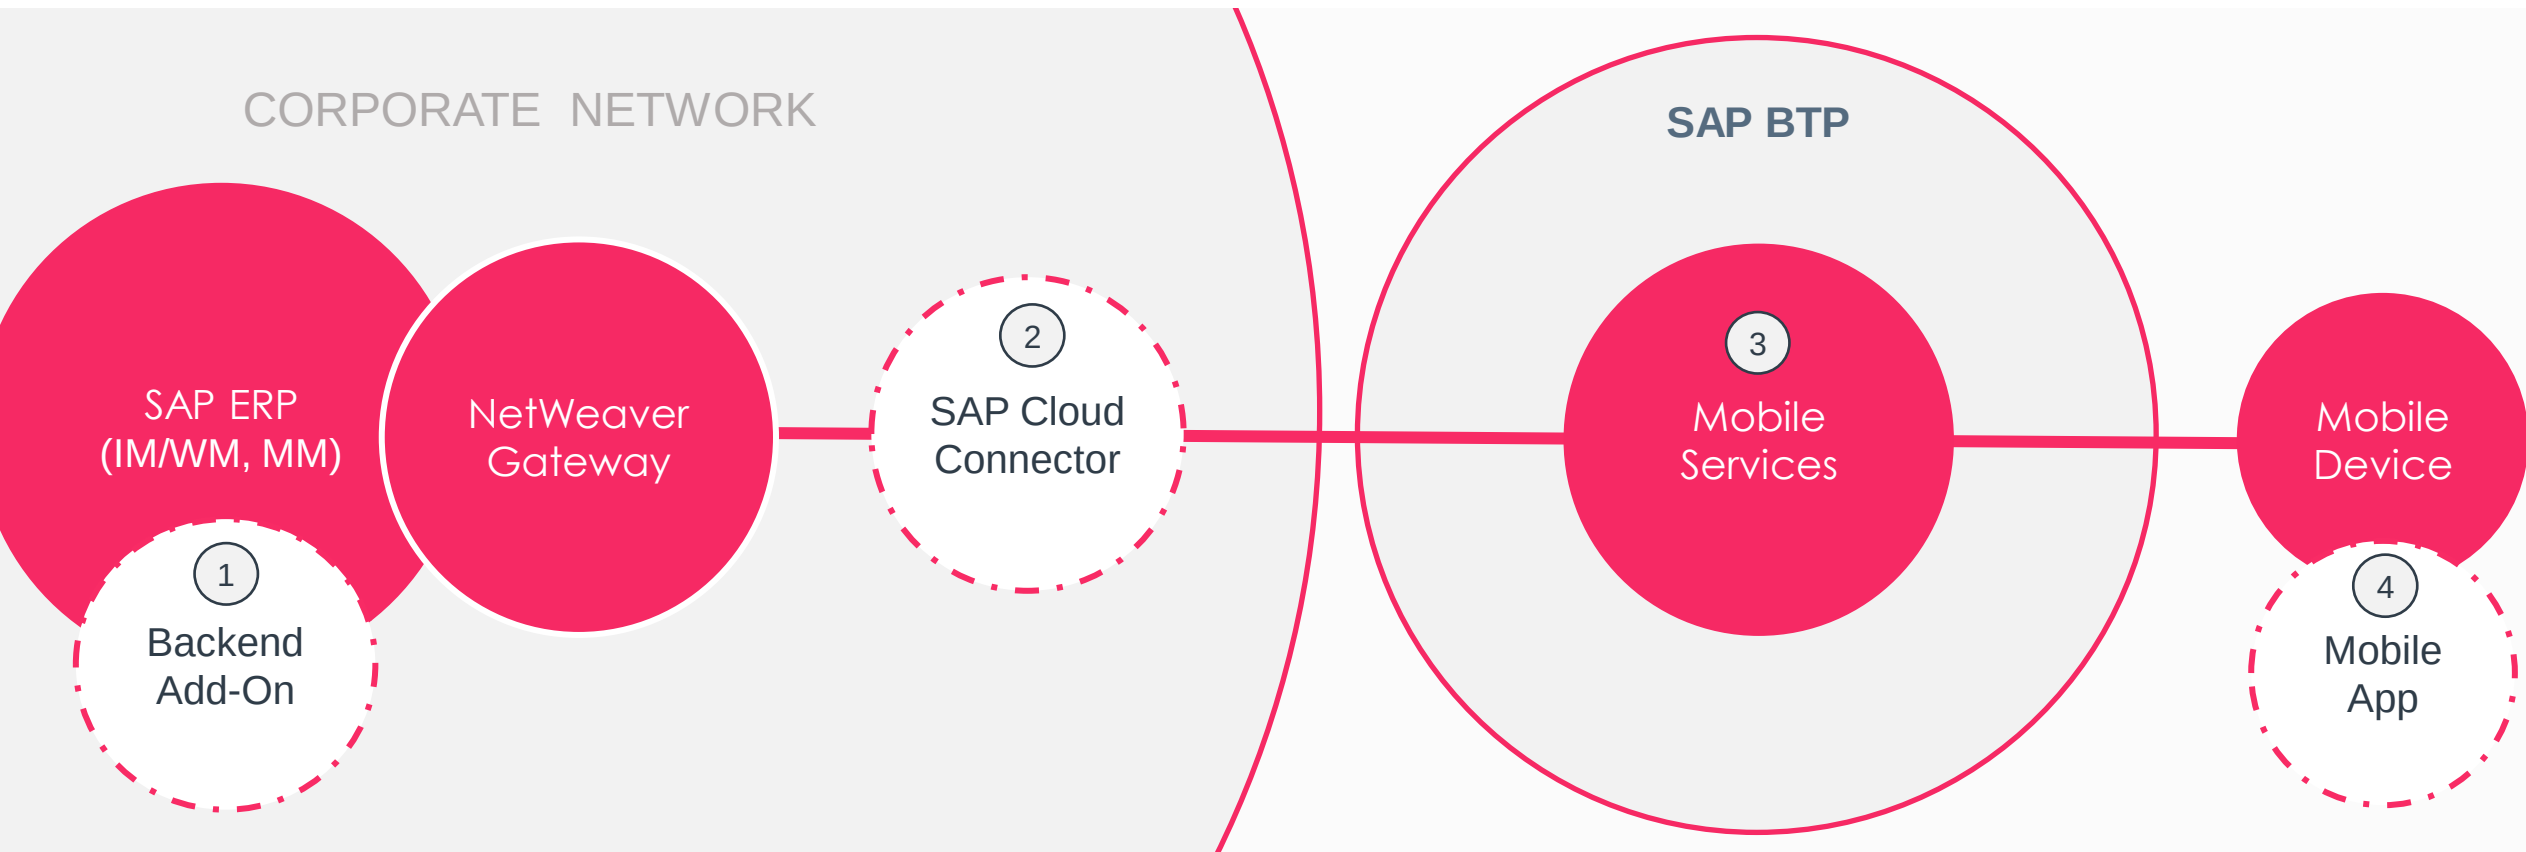

SOLUTION ARCHITECTURE.

CUSTOMER EXTENSION.

PRODUCT INSTALLATION.

- 1 Backend Add-On**
Install the Mobile Warehouse Backend Add-On and configure the backend system.

- 2 SAP Cloud Connector**
Install the SAP Cloud Connector to establish the connection from the backend system to the SAP BTP

- 3 Mobile Services**
Setup Mobile Warehouse on Mobile Services in the SAP BTP

- 4 Mobile Application**
Setup development environment, create customer specific build and distribute to devices
