

CONTROL SYSTEM SAW

MILLTECH

MILLTELLIGENCE WORLDWIDE

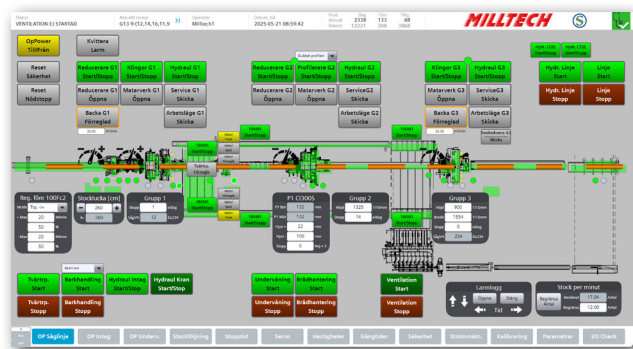

A BRAND BY ARIVISLANDA

LOG SORTING • LOG • UPGRADES & NEW

OVERVIEW

- Based on the latest technology platform in accordance with current industry standards.
- One single source supply for Controls, Measurement/Optimization and Machine Safety.
- The Control System solution is easily adapted to a wide range of line configurations and suppliers.
- Seamless integration with MillControl MillOptimizer and Taigatech.

**100+ SUCCESSFUL PROJECTS
COMMISSIONED GLOBALLY**

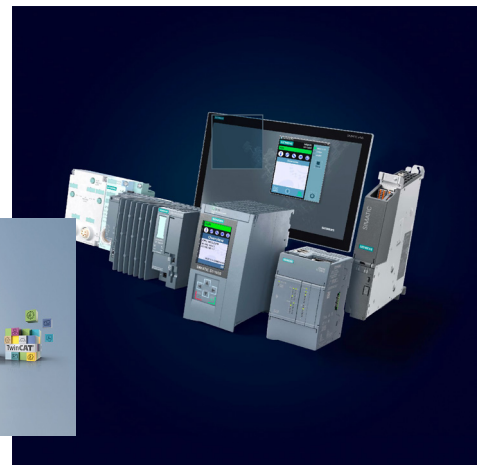

OPERATOR ENVIRONMENT

Designed according to industry standards of ergonomics, flexibility and functionality .

PLC-CONTROLS

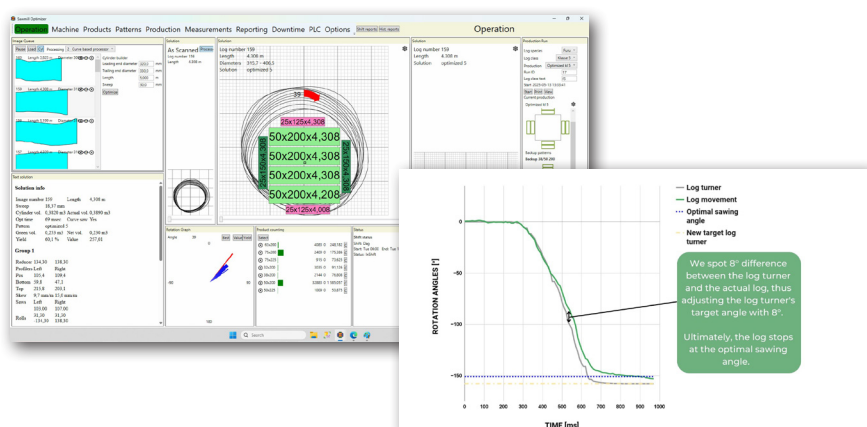

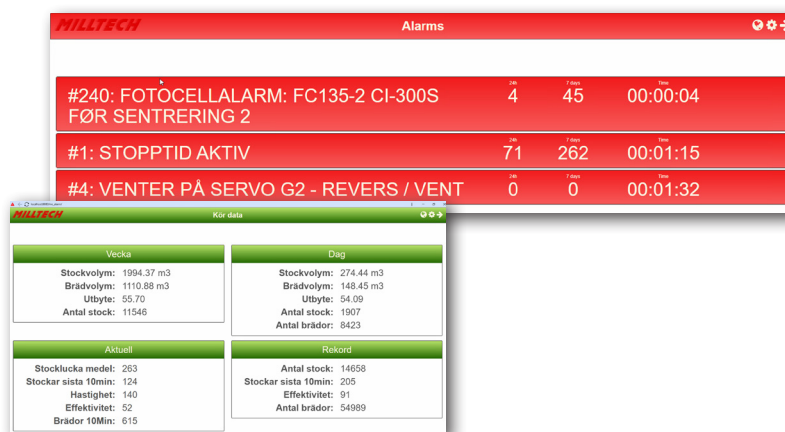

We offer a comprehensive solution of Control Systems based on the World's leading suppliers of PLC platforms.

INTAKE • SAWLINE W INSTALLATIONS

LINE ALARMS & PRODUCTION DATA

- Alarms are visualized on a dedicated screen, in real time and with the possibility to also generate historical data.
- Actual production data is presented according to customer requirements, with possibilities of export to external systems.

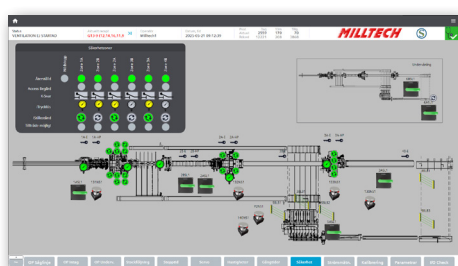

SCANNING & OPTIMIZATION

- The Milltech and Taigatech measurement systems are easily integrated with the PLC system to ensure maximum value yield at every stage of the production process.
- Possibility to also interact with other system suppliers.

USER INTERFACE

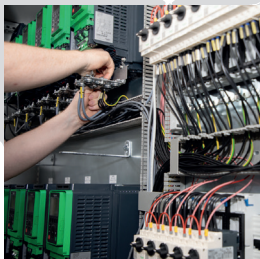

Intuitive and user-friendly interface for easy interaction between operator and sawline process.

MACHINE SAFETY

Can be supplied as an integrated part of the Milltech PLC-system
or as a standalone to existing systems and machine lines.

MILLTECH WORLDWIDE

Milltech (merged into AriVislanda, 2024) is part of the ARAT Group, which delivers high-tech equipment and automation primarily to the wood industry.

For over 20 years, Milltech has developed intelligent and integrated control systems for sawmills around the world. We offer control systems solutions from the log yard through the sawline up to board sorting and further processing lines.

Milltech is located in Växjö since 2002, with employees who have been in the industry since 1981 and have delivered systems to sawmills around the world, including in Chile, Argentina, the UK, Norway, Sweden, Poland, Japan, Australia, and Fiji.
